F-4 Phantom Pilot's Flight Operating

Manual Periscope Film Com 2007-03 One of the

great aircraft of the Cold War era, the

McDonnell Douglas F-4 Phantom II was the most

heavily produced supersonic, all-weather fighter

bomber. Capable of a top speed of Mach 2.23, it

set sixteen world records including an absolute

speed record of 1,606 mph and an altitude

record of 98,557 feet. The F-4 flew Vietnam, in

the Arab-Israeli conflict, and the Gulf War and

amassed a record of 393 aerial victories. F-4s

also flew as part of the USAF Thunderbirds and the U.S. Navy Blue Angels flight demonstration teams. Originally printed by McDonnell and the U.S. Navy in the 1960s, this flight operating handbook taught pilots everything they needed to know before entering the cockpit. Classified "restricted", the manual was recently declassified and is here reprinted in book form. This affordable facsimile has been reformatted. Raptors Keith L. Bildstein 2017-05-02 Raptors

are formally classified into five families and

include birds—such as eagles, ospreys, kites,

true hawks, buzzards, harriers, vultures, and

falcons—that are familiar and recognized by

many observers. These diurnal birds of prey are

found on every continent except Antarctica and

can thrive in seemingly inhospitable spots such

as deserts and the tundra. They have powerful

talons and hooked beaks for cutting and tearing

meat, and keen binocular vision to aid in their

hunting prowess. Because of their large size,

distinctive feeding habits, and long-distance

flight patterns, raptors intrigue humans and

have been the subject of much general interest

as well as extensive scientific research. Keith L.

Bildstein has watched and studied raptors on

five continents and is well prepared to explain

their critical importance, not only as ecological

entities but also as inspirational tokens across

natural and human-dominated landscapes. His

book offers a comprehensive and accessible

Raptor James Macdonald Lockhart 2017-04-07 As evidenced by the incredible success of Helen MacDonald's *H is for Hawk*, and the legions of fans of *Pale Male*, the incredible red-tailed hawk of 5th avenue, we are full of rapture for raptors. James Macdonald Lockhart, is among the many who have sought out these incredible birds, and in this lyrical work of natural history he seeks out 15 different raptors, in 15 different landscapes across England: a journey in search of raptors, a journey through the birds and into their worlds. Raptors are by nature scarce and extremely elusive. Of Pandionidae (osprey), Accipitridae (broad-winged harrier, eagle, buzzard, red kite) and Falconidae (peregrine, sparrowhawk etc.) only widespread buzzards, kestrels and kites are easily seen. Lockhart follows loosely the trail of 19th-century Scottish naturalist and artist William MacGillivray (1796-1852), As Philip Hoare wrote of it, James MacDonald Lockhart puts the rapture back in the raptor. This is in-the-moment writing, raw in beak and claw. With its gorgeously felt sense of life and place, *Raptor* rips at its words, turning them into exquisite portraits of the utter wild, shaping soaring, obsessive beauty out of the British landscape and its imperial birds"

MORE WAR... A desperate attack on the Kilrathi homeworld had succeeded in destroying the entire planet, including the Emperor and his warlords. The surviving Kilrathi, on warships and on their colony worlds were hopelessly demoralized and had sued for peace. The catlike warrior race was no longer a threat to Earth and its colonies. Thirty-five years of war had finally come to an end, bringing peace in our time. They thought... The reality was more ominous. There were still plenty of independent Kilrathi warlords surviving, commanding a formidable array of warships and weaponry. Some wanted revenge on the apes who had destroyed the sacred homeworld, some wanted to set up their own new empires, and some were simply content to go pirate, raiding human colonies at will. But back on Earth, the war-weary people and their leaders turned a deaf ear to reports of Kilrathi belligerence, preferring to look forward to a peaceful and prosperous future. But it was only the calm before a new story... At the publisher's request, this title is sold without DRM (Digital Rights Management).

Ships of the Line Doug Drexler 2014-12-02 In celebration of one of science fiction's most beloved franchises, an updated edition of the acclaimed *Ships of the Line* hardcover collection. They dared to risk it all in a skiff of reeds or leather, on a ship of wood or steel, knowing the only thing between them and certain death was their ship. To explore, to seek out what lay beyond the close and comfortable, every explorer had to embrace danger. And as they did so, what arose was a mystical bond, a passion for the ships that carried them. From the

very first time humans dared to warp the fabric of space, escaping from the ashes of the third World War, they also created ships. These vessels have become the icons of mankind's desire to rise above the everyday, to seek out and make the unknown known. And these ships that travel the stellar seas have stirred the same passions as the ones that floated in the oceans. While every captain has wished that their starship could be outfitted in the same manner as the sailing ship H.M.S. Beagle—without weapons—that proved untenable. From the start, Starfleet realized that each vessel, due to the limited range of the early warp engines, must be able to stand alone against any attack. Thus arose the idea, taken from the days of wooden sailing ships, that every Starfleet vessel must stand as a ship of the line. Through the actions of their captains and crews, countless starships have taken on that role. Here we remember some of those ships and their heroic crews. In celebration of one of science fiction's most beloved franchises, this updated edition of the acclaimed *Ships of the Line* hardcover collection now includes dozens of additional images brought together for the first time in book format—spectacular renderings featured in the highly successful *Star Trek: Ships of the Line* calendar series. With text by *Star Trek's* own Michael Okuda, the story of each of these valiant starships now comes to life. ™, ®, & © 2014 CBS Studios, Inc.
