Objections to Nuclear Defence Nigel Blake 2020-12-02 Moral and political questions are vitally relevant to the issue of survival in the nuclear age. Ethics has much to teach us about the meaning of national defence and civic responsibility in the nuclear state. For instance, those in NATO who argue for increased spending on such weapons do so with the intention of defending the values of the West. They must therefore be absolutely sure that they are not – as the contributors to this volume, originally published in 1984, powerfully suggest – undermining or destroying those values by the very means they adopt to preserve them. With the continued success of nuclear deterrence itself in question, responsible citizens feel an urgent need to assess the clash between personal doubts, cherished principles and their governments' loudly voiced moral certainties. In *Objections to Nuclear Defence*, professional philosophers of widely varying persuasions provide new analyses of these problems. They spell out clearly and vividly the moral and political objections – objections to the concrete nuclear policies of the Western governments today. Often impassioned but always rational, the book will be of special interest to students of international affairs, peace studies and applied philosophy as well as to the general reader who is trying to choose between political parties in Europe or North America.

Terrace VII Sarah L Johnson 2019-11-05 Welcome to the Seventh Terrace of Dante's tower of Purgatory.

Here, in darkness lit only by a wall of flame, we find souls enslaved by the sin of lust. Lust is a great and terrible thing, and this collection of dark tales follows a mere handful of the many paths leading to the wall of fire.

Passenger Rail Franchising Great Britain. Parliament. House of Commons. Transport Committee 2006 It is thirteen years since the Railways Act 1993 started the process of privatising British Rail, replacing it with one

company owning and managing the infrastructure, an open-access system for freight services and a series of twenty-five passenger franchises let to private companies for a specified period of time. This period has seen almost continuous change, and there is now a new 'triumvirate' framework with the Department for Transport, the Office of Rail Regulation and Network Rail in place, with the third generation of franchises in the process of being let and the number being reduced to nineteen. The Committee's report examines the current franchising system, focusing on the coherence of its objectives, the effectiveness of the process for awarding franchises and the management of franchise agreements, and whether more competition and vertical integration is needed. Findings include that the current system represents a policy muddle which lacks a coherent framework for the development of good services and delivery of value for money for passengers and taxpayers. The only way the Government can increase capacity and improve services for the long-term is to drop the dogmatic pursuit of competition in its decision-making as to what the private and public sectors can and should do in future. The Government's forthcoming long-term strategy for the railways will need to address these issues, and to set out a structure and a strategy capable of securing quality passenger rail services to meet demand over the next half a century.
