The Black Kingdom of the Nile Charles Bonnet 2019 For centuries, Egyptian civilization has been at the origin of the story we tell about the West. But Charles Bonnet's archaeological excavations have unearthed extraordinary sites in modern Sudan that challenge this notion and compel us to look to black Africa and the Nubian Kingdom of Kush, where a highly civilized state existed 2500-1500 BCE.

Ancient Civilizations of Africa G. Mokhtar 1981-01-01 Deals with the period beginning at the close of the Neolithic era, from around the eighth millennium before our era. This period of some 9,000 years of history has been subdivided into four major geographical zones, following the pattern of African historical research. Chapters 1 to 12 cover the corridor of the Nile, Egypt and Nubia. Chapters 13 to 16 relate to the Ethiopian highlands. Chapters 17 to 20 describe the part of Africa later called the Maghrib and its Saharan hinterland. Chapters 21 to 29, the rest of Africa as well as some of the islands of the Indian Ocean.--Publisher's description

Egypt, Kush, Aksum Kenny Mann 1997 Studies the history and traditions of the ancient African kingdoms of Egypt, Kush, and Aksum, and their relationships with each other.

Introduction to the History of African Civilization: Precolonial Africa C. Magbaily Fyle 1999 Introduction to the History of African Civilization explores the major issues dominating African Civilization from the earliest recorded period to the eve of colonial conquest of the continent. C. Magbaily Fyle begins with a discussion of the myths and prejudices underlying most analyses of African issues, and moves into a discussion of the origin of humanity; the similarities between the classical Nile valley civilizations of Egypt, Nubia, Kush, and Axum; and the spread of Islam through African societies. He portrays the systems of precolonial government and society, including the role of women in governance, as well as traditional trade and agricultural patterns. Fyle provides a new perspective on the Islamic Jihads, shifting focus from Sokoto and Macina to the Senegambia and the Upper Guinea region, and a revised interpretation of the Atlantic slave trade, which includes the importance of African objectors to this process. He also discusses important cultural features such as the traditional African food, architecture, and typical structures of towns.

World Migration Report 2020 United Nations 2019-11-27 Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

The Black Jews of Africa Edith Bruder 2008-06-05 "This book presents, one by one, the different groups of Black Jews in Western central, eastern, and southern Africa and the ways in which they have used and imagined their oral history and traditional customs to construct a distinct Jewish identity. It explores the ways in which Africans have interacted with the ancient mythological sub-strata of both western and African ideas of Judaism."--Résumé de l'éditeur.

Ancient African Civilizations Stanley Mayer Burstein 2009 The first edition of this book provided teachers of African history, for the first time, with fully annotated translations of the most important Greek and Roman sources for the history of these two remarkable ancient African civilizations. The new edition retains all of the features that made the first edition so successful while significantly expanding the coverage of the history of Kush and Axum. The illustration program has been revised, new translations have been added including recently discovered Nubian and Axumite royal documents, and a new chapter treats the origins of the kingdom of Kush and its relations with Egypt and Persia.

The Kingdom of Kush Derek A. Welsby 1996 An authoritative study of the thousand year empire of the Kushites, Egypt's Southern neighbours. Draws together all the information on this fascinating people and their history.

Masterpieces of Ancient Egypt Nigel Strudwick 2012-07-01 Masterpieces of Ancient Egypt is the first illustrated guide to the highlights of the British Museum's wonderful collection. It features over 180 of the most stunning and important Egyptian and Sudanese artefacts in the Museum, including not only internationally famous items such as the Rosetta Stone, but also a wealth of lesser-known but equally significant or beautiful pieces. The objects are arranged in chronological order, beginning with the earliest predynastic pots and figurines, and continuing through the three thousand year rule of the Pharaohs, right up to Roman Egypt and the Coptic Christian period.

Aksum and Nubia George Hatke 2013-01-07 Aksum and Nubia assembles and analyzes the textual and archaeological evidence of interaction between Nubia and the Ethiopian kingdom of Aksum, focusing primarily on the fourth century CE. Although ancient Nubia and Ethiopia have been the subject of a growing number of studies in recent years, little attention has been given to contact between these two regions. Hatke argues that ancient Northeast Africa cannot be treated as a unified area politically, economically, or culturally. Rather, Nubia and Ethiopia developed within very different regional spheres of interaction, as a result of which the Nubian kingdom of Kush came to focus its energies on the Nile Valley, relying on this as its main route of contact with the outside world, while Aksum was oriented towards the Red Sea and Arabia. In this way Aksum and Kush coexisted in peace for most of their history, and such contact as they maintained with each other was limited to small-scale commerce. Only in the fourth century CE did Aksum take up arms against Kush, and even then the conflict seems to have been related mainly to security issues on Aksum's western frontier. Although Aksum never managed to hold onto Kush for long, much less dealt the final death-blow to the Nubian kingdom, as is often believed, claims to Kush continued to play a role in Aksumite royal ideology as late as the sixth century. Aksum and Nubia critically examines the extent to which relations between two ancient African states were influenced by warfare, commerce, and political fictions.

Kingdom of Kush: The Civilization of Ancient Nubia History Titans 2021-08-17 The Kingdom of Kush and the ancient Nubian civilization, in general, are important not only for their achievements but also for what these achievements represent in the abstract. The existence of such civilizations challenges many traditional, Eurocentric views of the world and its history. Of course, ancient Egypt is impressive enough on its own, but Nubia is even further south and further away from European influence and, in that sense, more African. Neighboring Ethiopia and numerous other locales in Africa were home to other civilizations that have seen their share of success too, so Nubia and its Kingdom of Kush are not alone in that sense. Overall, Africa is a fascinating place to study from the standpoint of scholars from all sorts of backgrounds and sciences. After all, Africa is where mankind originates, so its heritage is something that's important for all of humanity to study.

The Oxford Handbook of Ancient Nubia Geoff Emberling 2020-12-25 The cultures of Nubia built the earliest cities, states, and empires of inner Africa, but they remain relatively poorly known outside their modern descendants and the community of archaeologists, historians, and art historians researching them. The earliest archaeological work in Nubia was motivated by the region's role as neighbor, trade partner, and enemy of ancient Egypt. Increasingly, however, ancient Nile-based Nubian cultures are recognized in their own right as the earliest complex societies in inner Africa. As agro-pastoral cultures, Nubian settlement, economy, political organization, and religious ideologies were often organized differently from those of the urban, bureaucratic, and predominantly agricultural states of Egypt and the ancient Near East. Nubian societies are thus of great interest in comparative study, and are also recognized for their broader impact on the histories of the eastern Mediterranean and the Near East. The Oxford Handbook of Ancient Nubia brings together chapters by an international group of scholars on a wide variety of topics that relate to the history and archaeology of the region. After important introductory chapters on the history of research in Nubia and on its climate and physical environment, the largest part of the volume focuses on the sequence of cultures that lead almost to the present day. Several cross-cutting themes are woven through these chapters, including essays on desert cultures and on Nubians in Egypt. Eleven final chapters synthesize subjects across all historical phases, including gender and the body, economy and trade, landscape archaeology, iron working, and stone quarrying.

The African Origin of Civilization Cheikh Anta Diop 2012-09-01 Now in its 30th printing, this classic presents historical, archaeological, and anthropological evidence to support the theory that ancient Egypt was a black civilization.

Ancient Nubia Marjorie M. Fisher 2012 Nubia's remote setting has not only lent it an air of mystery, but also isolated it from exploration. This book attempts to document some of the recent discoveries about ancient Nubia, with its remarkable history, architecture, and culture. By doing so, the authors of the essays give us a picture of this rich, but unfamiliar, African legacy.

The Ancient Kushites Liz Sonneborn 2005 Describes the civilization of ancient Kush, including the roles and responsibilities of the people within different social classes, including rulers, warriors, priests, writers, and the common people.

The Art of South and Southeast Asia Steven Kossak 2001 Presents works of art selected from the South and Southeast Asian and Islamic collection of The Metropolitan Museum of Art, lessons plans, and classroom activities.

Arts of Ancient Nubia: Mfa Highlights 2018-08-28 Ancient Nubia was home to a series of civilizations between the sixth millennium BCE and 350 CE that produced towering monuments, including more pyramids than in neighboring Egypt, and artifacts of enduring beauty and significance. Nubia's trade network reached across the Mediterranean and far into Africa. At the time that Nubian kings conquered Egypt, in the middle of the eighth century BCE, they controlled one of the largest empires of the ancient world. The Museum of Fine Arts, Boston, has the most extensive and important collection of ancient Nubian art outside of Khartoum, mostly gathered during the pioneering Harvard University-Boston Museum of Fine Arts Expedition in the first half of the 20th century. The objects highlighted in this volume include refined early ceramics, monumental statues and relief carvings made for royal pyramids, exquisite gold and enamel jewelry, playful decorations for furniture and clothing, and luxury goods traded from around the Mediterranean world.

Africans John Iliffe 2007-08-13 In a vast and all-embracing study of Africa, from the origins of mankind to the AIDS epidemic, John Iliffe refocuses its history on the peopling of an environmentally hostile continent. Africans have been pioneers struggling against disease and nature, and their social, economic and political institutions have been designed to ensure their survival. In the context of medical progress and other twentieth-century innovations, however, the same institutions have bred the most rapid population growth the world has ever seen.

Africans: The History of a Continent is thus a single story binding living Africans to their earliest human ancestors.

From Slave to Pharaoh Donald B. Redford 2004-08-06 In *From Slave to Pharaoh*, noted Egyptologist Donald B. Redford examines over two millennia of complex social and cultural interactions between Egypt and the Nubian and Sudanese civilizations that lay to the south of Egypt. These interactions resulted in the expulsion of the black Kushite pharaohs of the Twenty-fifth Dynasty in 671 B.C. by an invading Assyrian army. Redford traces the development of Egyptian perceptions of race as their dominance over the darker-skinned peoples of Nubia and the Sudan grew, exploring the cultural construction of spatial and spiritual boundaries between Egypt and other African peoples. Redford focuses on the role of racial identity in the formulation of imperial power in Egypt and the legitimization of its sphere of influence, and he highlights the dichotomy between the Egyptians' treatment of the black Africans it deemed enemies and of those living within Egyptian society. He also describes the range of responses—from resistance to assimilation—of subjugated Nubians and Sudanese to their loss of self-determination.

Indeed, by the time of the Twenty-fifth Dynasty, the culture of the Kushite kings who conquered Egypt in the late eighth century B.C. was thoroughly Egyptian itself. Moving beyond recent debates between Afrocentrists and their critics over the racial characteristics of Egyptian civilization, *From Slave to Pharaoh* reveals the true complexity of race, identity, and power in Egypt as documented through surviving texts and artifacts, while at the same time providing a compelling account of war, conquest, and culture in the ancient world.

The Double Kingdom Under Taharqo Jeremy W. Pope 2014-01-17 In *The Double Kingdom under Taharqo*, Jeremy Pope examines the strategies used by Taharqo, a Kushite pharaoh of ancient Egypt's Twenty-Fifth Dynasty, to govern Nubia and Egypt together during the seventh century BC.

Timothy Kendall 1997 This book chronicles one of the twentieth century's greatest discoveries in African archaeology. In 1913, in the northern Sudanese village of Kerma on the east bank of the Nile, G. A. Reisner identified the remains of an ancient city with colossal architecture & spectacular royal tombs. Misinterpreted as a far-flung Egyptian trading colony, Kerma mystified scholars for decades until new research & renewed excavations by C. Bonnet revealed it to be the capital of the early Nubian kingdom of Kush, mentioned intermittently in Egyptian texts. Dating from about 2,500 B.C. Kerma established control of the river & overland trade routes linking central Africa with Egypt. Ultimately threatening Egypt, it was overthrown by the pharaohs about 1500 B.C. Detailing its discovery, this fascinating book describes the city & its palaces, temples & tombs as known through excavations to 1995. Written to accompany an exhibition of Kerma's pottery, jewelry, & artifacts, this book includes a catalog of the exhibition & many photographs, in color & black & white, documenting the archaeological site & its art. History of International Relations Erik Ringmar 2019-08-02 Existing textbooks on international relations treat history in a cursory fashion and perpetuate a Euro-centric perspective. This textbook pioneers a new approach by historicizing the material traditionally taught in International Relations courses, and by explicitly focusing on non-European cases, debates and issues. The volume is divided into three parts. The first part focuses on the international systems that traditionally existed in Europe, East Asia, pre-Columbian Central and South America, Africa and Polynesia. The second part discusses the ways in which these international systems were brought into contact with each other through the agency of Mongols in Central Asia, Arabs in the Mediterranean and the Indian Ocean, Indic and Sinic societies in South East Asia, and the Europeans through their travels and colonial expansion. The concluding section concerns contemporary issues: the processes of decolonization, neo-colonialism and globalization – and their consequences on contemporary society. *History of International Relations* provides a unique textbook for undergraduate and graduate students of international relations, and anybody interested in international relations theory, history, and contemporary politics.
