**Revisiting Education in the New Latino Diaspora** Edmund Hamann 2015-04-01 For most of US history, most of America’s Latino population has lived in nine states—California, Arizona, New Mexico, Colorado, Texas, Illinois, Florida, New Jersey, and New York. It follows that most education research that considered the experiences of Latino families with US schools came from these same states. But in the last 30 years Latinos have been resettling across the US, attending schools, and creating new patterns of inter-ethnic interaction in educational settings. Much of this interaction with this New Latino Diaspora has been initially tentative and improvisational, but too often it has left intact the patterns of lower educational success that have prevailed in the traditional Latino diaspora. Revisiting Education in the New Latino Diaspora is an extensive update, with all new material, of the groundbreaking volume Education in the New Latino Diaspora (Ablex Publishing) that these same editors produced in 2002. This volume consciously includes a number of junior scholars (e.g., C. Allen Lynn, Soria Colomer, Amanda Morales, Rebecca Lowenhaupt, Adam Sawyer) and more established ones (Frances Contreras, Jason Irizarry, Socorro Herrera, Linda Harklau) as it considers empirical cases from Washington State to Georgia, from the Mid-Atlantic to the Great Plains, where rural, suburban, and urban communities start their second or third decades of responding to a previously unprecedented growth in newcomer Latino populations. With excuses of surprise and improvisational strategies less persuasive as Latino newcomer populations become less new, this volume considers the persistence, the anomie, and pragmatism of Latino newcomers on the one hand, with the variously enlightened, paternalistic, dismissive, and xenophobic responses of educators and education systems on the other. With foci as personal as accounts of growing up as an adoptee in a mixed race family and the testimonio of a ‘successful’ undocumented college graduate to the macro scale of examining state-level education policies and with an age range from early childhood education to the university level, this volume insists that the worlds of education research and migration studies can both gain from considering the educational responses in the last two decades to the ‘newish’ Latino presence in the 41 U.S. states that have not long been the home to large, well-established Latino populations, but that now enroll 2.5 million Latino students in K-12 alone. “Timely and compelling, Revisiting Education in the NLD offers new insight into the Latino Diaspora in the US just as the discussions regarding immigration policy, bilingual education, and immigrant rights are gaining steam. Drawing from a variety of perspectives, contributing authors interrogate the very concept of the diaspora. The wide range of research in this volume thoughtfully illustrates the nuanced phenomena and provides rich descriptions of complex situations. No longer a simple question of immigration, the book considers language and legal status in schools, international adoption, teacher preparation, and the relationships between established and relatively new Latino communities in a variety of contexts. Comprised of rich, thoughtful research Revisiting Education provides a fascinating window into the context of Latino reception nationwide. ~ Rebecca M. Callahan, Associate Professor - University of Texas-Austin As the leader of a 10-years-and-counting research study in Mexico that has identified and interviewed transnationally mobile students with prior experience in U.S. schools, I can affirm that in addition to students with backgrounds in California, Arizona, Texas, and Colorado, migration links now join schools in Georgia, Minnesota, Oklahoma, Alabama, etc. to schools in Mexico. For that reason and many others I am excited to see this far-ranging, interdisciplinary, new text that considers policy implementation through lenses as different as teacher preparation, Latino adoption into culturally mixed families, the fate of Latino newcomers in ‘low density’ districts where there are few like them, and the misuse of Spanish teachers as interpreters. This is an relevant book for American educators and scholars, but also for readers beyond U.S. borders. Hamann, Wortham, Murillo, and their contributors should be celebrated for this fine new collection. ~ Dr. Víctor Zúñiga, Dean of Research and Extension, Universidad de Monterrey **Avancemos! 2 Dos** Estella Marie Gahala 2012-04-09

**Bien Dit!** John DeMado 2007-02-28 **Students at Risk of School Failure** José Jesús Gázquez 2018-10-18 The main objective of this Research Topic is to determine the conditions that place students at risk of school failure, identifying student and context variables. In spite of the fact that there is currently little doubt about how one learns and how to teach, in some countries of the “developed world,” there is still there is a high rate of school failure. Although the term “school failure” is a very complex construct, insofar as its causes, consequences, and development, from the field of educational psychology, the construct “student engagement” has recently gained special interest in an attempt to deal with the serious problem of school failure. School engagement builds on the anatomy of the students’ involvement in school and describes their feelings, behaviors, and thoughts about their school experiences. So, engagement is an important component of students’ school experience, with a close relationship to achievement and school failure. Children who self-set academic goals, attend school regularly and on time, behave well in class, complete their homework, and study at home are likely to interact adequately with the school social and physical environments and perform well in school. In contrast, children who miss school are more likely to display disruptive behaviors in class, miss homework frequently, exhibit violent behaviors on the playground, fail subjects, be retained and, if the behaviors persist, quit school. Moreover, engagement should also be considered as an important school outcome, eliciting more or less supportive reactions from educators. For example, children who display school-engaged behaviors are likely to receive motivational and instructional support from their teachers. The opposite may also be true. But what makes student engage more or less? The relevant literature indicates that personal variables (e.g., sensory, motor, neurodevelopmental, cognitive, motivational, emotional, behavior problems, learning difficulties, addictions), social and/or cultural variables (e.g., negative family conditions, child abuse, cultural deprivation, ethnic conditions, immigration), or school variables (e.g., coexistence at school, bullying, cyberbullying) may concurrently hinder engagement, preventing the student from acquiring the learnings in the same conditions as the rest of the classmates.

Readers will be able to follow the themes and strands and see how their work contributes to the development of the field. Language and the Joint Creation of Knowledge draws on the most prominent writing of Neil Mercer, covering his ground-breaking and critically acclaimed work on the role of talk in education, and on the relationship between spoken language and cognition. The text explores key themes, relating theoretical ideas to research evidence and to practical educational situations that improve children’s lives. Offering students and researchers a clear, accessible and up-to-date account of a sociocultural perspective on the relationship between spoken language and cognition, it explains one of the key themes in Neil Mercer’s work – that humans have uniquely evolved the capacity to think together, or ‘interthink’. Offering a crucial insight into the work of Neil Mercer, this selection showcases why his approach has become the dominant paradigm in educational research, and why it is increasingly influential in the psychology of teaching and learning. This unique collection of published articles and chapters, which represent the key themes and range of his research over the last 40 years, will be of interest to all followers of his work and any reader interested in the role of language in education.
