**Catholic Schools** Gerald Grace 2002-11-01 In this ground-breaking book, Gerald Grace addresses the dilemmas facing Catholic education in an increasingly secular and consumer-driven culture. The book combines an original theoretical framework with research drawn from interviews with sixty Catholic secondary head teachers from deprived urban areas. Issues discussed include:

\*Catholic meanings of academic success \*tensions between market values and Catholic values \*threats to the mission integrity of Catholic schools \*the spiritual, moral and social justice commitments of contemporary Catholic schools This book will be equally useful to leaders of Catholic and other schools and to all those interested in values and leadership in schooling.

*Faith Formation of the Laity in Catholic Schools* Sister Patricia Helene Earl 2008-10-01 Two major real-world problems prompted this study: maintaining the Catholic identity of the Catholic schools, and increasing interest in character education. Traditionally, Catholic schools in the United States were staffed exclusively by priests, sisters, and brothers. Today, they are predominately staffed by laypersons. This change has influenced the essential religious character and culture of Catholic schools. While Religious filter their teachings through their own religious training and emphasize the mission and charisma of Catholic education, lay staff often lack the same intensely religious experiences to bring to the teaching/learning environment. This qualitative interview study explored the influence that a series of spirituality and virtue seminars had on lay teachers' perceptions of the Catholic school and character education.

**Freedom of Religion and Belief: A World Report** Kevin Boyle 2013-03-07 This report, the first of its kind yet to be published, provides a detailed and impartial account of how the individual's right to hold beliefs is understood, protected or denied throughout the world. Consisting of accessible, short edited entries based on drafts commissioned from experts living in the countries surveyed, it exposes persecution and discrimination in virtually all world regions. The book: \* provides an analysis of United Nations standards of freedom of religion and belief \* covers over fifty countries, divided into regions and introduced by a regional overview \* covers themes including: the relationships between belief groups and the state; freedom to manifest belief in law and practice; religion and schools; religious minorities; new religious movements; the impact of beliefs on the status of women; and the extent to which conscientious objection to military service is recognised by governments \* draws on examples of accommodation and co-operation between different religions and beliefs and identifies the main challenges to be overcome if the diversity of human conviction is to be established.

**Catholic Women Writers** Mary R. Reichardt 2001 Women have been writing in the Catholic tradition since early medieval times, yet no single volume has brought together critical evaluations of their works until now. The first reference of its kind, *Catholic Women Writers* provides biographical, critical, and bibliographical entries on 64 Catholic women writers from around the world and across the centuries. Each entry is written by an expert contributor and is designed to acquaint the reader with the author, her major works, her Catholic and women's themes, and her critical reception. An introductory essay places the authors in the context and tradition of Catholic writing, and a selected, general bibliography lists works for further reading.

*Naked Parish Priest* Stephen Loudon 2003-08-01 Based on a survey sent out to Catholic clergy in the UK, this study

is a major contribution from empirical theology towards interpreting the health and potential of the priesthood today. The issues raised by this new study concern the nature and health of the priesthood, a topic of most urgent concern at a time of clerical scandal and abuse. The conclusions of this book are extremely revealing but fundamentally positive for anyone concerned with the future of the Christian Church at the start of a new millennium.

**Cardinal Hume and the Changing Face of English**

**Catholicism** Peter Stanford 1999-01-08 After the persecutions that followed the Reformation, the Catholic Church that re-emerged in the 19th century was a defensive, introspective one, largely made up of working-class immigrants and a handful of land-owning families who kept the faith despite adversity. It was viewed with some suspicion by the English Establishment as something foreign, subversive, to be held at arm's length. But particularly after World War II a new generation of educated Catholics emerged, outward-looking, questioning, anxious to take their places in society. Peter Stanford argues that Basil Hume's appointment was a symbol of change. His very Englishness has exorcised some of the nightmares in the national subconscious about the Catholic Church. And in his struggles as a leader with a flock that is not as obedient as once it was, the cardinal has redefined English Catholicism by blending its traditional theological conservatism with a liberal pastoral practice.

**Education in a Catholic Perspective** John Sullivan 2016-04-29 A distance is opening up between Catholic education and the rich intellectual heritage of the Catholic Church. *Education in a Catholic Perspective* explores Catholic philosophical and theological foundations for both education per se and for Catholic education in particular. With contributions spanning the theological foundations of Catholic education, the interplay of theology and education, and discussions of the social and missional dimensions of education, this book will be of considerable interest to educators and students of Catholic education, to academics in the fields of applied theology and philosophy and to those with an interest in the foundations of education.

**Catholic Schools and the Common Good** Anthony S. Bryk 2009-06-30 The authors examine a broad range of Catholic high schools to determine whether or not students are better educated in these schools than they are in public schools. They find that the Catholic schools do have an independent effect on achievement, especially in reducing disparities between disadvantaged and privileged students. The Catholic school of today, they show, is informed by a vision, similar to that of John Dewey, of the school as a community committed to democratic education and the common good of all students.

*Catholic Education: Distinctive and Inclusive* J. Sullivan 2001-10-31 How coherent is the claim that Catholic education is both distinctive and inclusive? This question, so crucial, both for the adequate articulation of a *raison d'être* for Catholic schools all over the world and also for the promotion of their healthy functioning, has not hitherto been addressed critically. Here it receives penetrating analysis and constructive resolution in a comprehensive treatment that integrates theological, philosophical and educational perspectives. The argument draws on wide-ranging scholarship, offering new insights into the relevance for Catholic education of thinkers whose work has been relatively neglected. The advance in understanding of how distinctiveness relates to inclusiveness is underpinned by the author's lengthy experience of teaching and leadership in Catholic schools; it is further informed by his extended and continuing dialogue with Catholic educators at all levels and in many different countries.

International Handbook of Catholic Education Gerald Grace 2007-12-07 Knowledge of Catholic educational scholarship and research has been largely confined to specific national settings. Now is the time to bring together this scholarship. This is the first international handbook on Catholic educational scholarship and research. The unifying theme of the Handbook is 'Catholic Education: challenges and responses' in a number of international settings. In addition to analyzing the largest faith-based educational system worldwide, the book also critically examines contemporary issues such as church-state relations and the impact of secularization and globalization.

**Gravissimum Educationis** Gerald M. Cattaro 2015-08-06 *Gravissimum Educationis: Golden Opportunities in American Catholic Education 50 Years after Vatican II* reviews the development of American Catholic schools since the promulgation of *Gravissimum Educationis*, the only document on education produced by the Ecumenical Council known as Vatican II. This document literally translated as "The Importance of Education," addresses how extremely vital Catholic education, in particular, is in modern life. Cattaro and Russo also reflect on changes that have transpired since the Third Plenary Council of Baltimore of 1884. This council forever changed the shape of nonpublic education in the United States in its decree that all parishes in the United States were to construct Catholic schools for the education of children. This volume is also designed to benefit Catholic Educators in all at levels from primary to higher education. The chapters in this book, prepared

by leading experts on various aspects of Catholic education or other forms of non-public education in the United States, provide a history as to the recent development on Catholic schools. *Gravissimum Educationis: Golden Opportunities in American Catholic Education 50 Years after Vatican II* provides the context of change and the current state of Catholic Schools in the United States and, in some sense, the global perspective. The scope of this book goes beyond the professional educator in Catholic Schools as it also address the stakeholders of Catholic education such as parents who are consumers, pastors, religious educators, and donors.

**When God Took Sides** Marianne Elliott 2009-09-24 The struggle between Catholic and Protestant has shaped Irish history since the Reformation, with tragic consequences up to the present day. But how do Catholics and Protestants in Ireland see each other? And how do they view their own communities and what these communities stand for? Tracing the history of religious identities in Ireland over the last three centuries, Marianne Elliott argues that these two questions are inextricably linked and that the identity of both Catholics and Protestants is shaped by the way that each community views the other. Cutting through the layers of myths, lies, and half-truths that make up the vision that Catholics and Protestants have of each other, she looks at how mutual religious stereotypes were developed over the centuries, how they were perpetuated and entrenched, and how they have defined modern identities and shaped Ireland's historical destiny, from the independence struggle and partition to the Troubles of the last four decades.

**Religious Schools in Europe** Marcel Maussen 2017-10-02 The European Convention on Human Rights guarantees freedom of education, including the opportunities to create and operate faith-based schools. However, as European societies become more religiously diverse and 'less religious' at the same time, the role of faith-based schools is increasingly being contested. Serious tensions have emerged between those who ardently support religious schools in their various forms, and those who oppose them. Given that faith-based schools enjoy basic constitutional guarantees in Europe, the controversy around them often surrounds issues of public financing, degrees of organisational and pedagogical autonomy, and educational practices and management. This volume is about the controversies surrounding religious schools in a number of Western European countries. The introductory chapter briefly analyses the structural pressures that affect the position of religious schools, outlining the relevant institutional arrangements in countries such as Denmark, Germany, France, Ireland, the Netherlands, and Scotland. The following chapters provide a detailed analysis of the discussions and controversies surrounding faith-based schools in each country. Finally, the two concluding chapters aim to provide a bigger, comparative picture with regard to these debates about religious education in liberal democratic states and culturally pluralist societies. This book was originally published as a special issue of *Comparative Education*.

**Just Universities** Gerald J Beyer 2021-02-23 Gerald J. Beyer's *Just Universities* discusses ways that U.S. Catholic institutions of higher education have embodied or failed to embody Catholic social teaching in their campus policies and practices. Beyer argues that the corporatization of the university has infected U.S. higher education with hyper-individualistic models and practices that hinder the ability of Catholic institutions to create an environment imbued with bedrock values and principles of Catholic Social Teaching such as respect for human rights, solidarity, and justice. Beyer problematizes corporatized higher education and shows how it has adversely affected

efforts at Catholic schools to promote worker justice on campus; equitable admissions; financial aid; retention policies; diversity and inclusion policies that treat people of color, women, and LGBTQ persons as full community members; just investment; and stewardship of resources and the environment.

**Encyclopedia of Catholic Social Thought, Social Science, and Social Policy** Michael L. Coulter 2012-04-05 This third, supplemental volume continues the approach of the original two volumes of the Encyclopedia of Catholic Social Thought, Social Science, and Social Policy that were published in 2007. First, the volume includes entries that explore Catholic social thought at its broadest, most theoretical level. Second, the volume includes entries that discuss recent social science research that bears on issues important to Catholic social thought. Third, the volume includes entries discussing specific issues of social policy that have become increasingly important in recent years.

**Renewing Catholic Schools** Most Reverend Samuel J. Aquila 2020-11-13 Catholic education remains one of the most compelling expressions of the Church's mission to form disciples. Despite decades of decline in the number of schools and students, many Catholic schools have been experiencing renewal by returning to the great legacy of the Catholic tradition. *Renewing Catholic Schools* offers an overview of the reasons behind this renewal and practical suggestions for administrators, clergy, teachers, and parents on how to begin the process of reinvigoration. The book begins by situating Catholic education within the Church's mission. Fidelity to Catholic mission and identity, including a commitment to the fulness of truth, provides the fundamental mark for the true success of Catholic education. The Catholic intellectual tradition, in particular, established by figures such as Augustine, Boethius, and Aquinas, can continue to direct Catholic schools, providing a depth of vision to overcome today's educational crisis. To transcend the now dominate secular model of education, Catholic schools can align their curriculum more closely to the Catholic tradition. One touchpoint comes from Archbishop Michael Miller's *The Holy See's Teaching on Catholic Schools*, which the book explores as a source for practical guidance. It also offers a Catholic vision for curriculum, examining the full range of subjects from gymnasium, the fine arts, the liberal arts, literature, history, and catechesis, all of which lead to a well-formed graduate, inspired by beauty, attune to truth, and ordered toward the good. Finally, the book provides a practical vision for renewing the school through the formation of teachers, creation of a school community, and by offering suggestions for implementation of a stronger Catholic mission and philosophy of education. The teacher, ultimately, should strive to teach like Jesus, while the community should joyfully embody the school's mission, making it a lived reality. The book concludes with examples of Catholic schools that have successfully undergone renewal.

**Combing the Tradition** Fred Herron 2007 This is a

sketchbook of the twin realities of Catholic faith and Catholic schools. A theological vision of the Catholic religious imagination provides the framework for viewing these realities from different angles. Taking Pope Benedict XVI's remark that 'truth is in the Whole,' this book looks at Catholic faith and education from the rich perspective of the sacramental or Catholic imagination. Historian John Tracy Ellis's conviction that this age will be known as 'the era of baptismal consciousness,' reflects a growing awareness in the entire Christian community that it must take its responsibilities in evangelization seriously. *Combing the Tradition* is an attempt to comb the Catholic tradition from the point of view of this re-emerging baptismal consciousness. It marvels at the role that Catholic schools, teachers, parents, and students play in recreating this great truth. It finds God's loving hand at work in the lives of citizens seeking meaning at Ground Zero, in the re-emerging theology of the domestic church, and in understanding the task of Catholic education. It raises questions concerning the impact of consumer society on the lives of our young people and finds hope in schools, which continue to shape the religious imaginations of the next generation of a community of disciples.

**A Theory of Catholic Education** Sean Whittle 2014-11-20 Presenting a robust and philosophically based account of education from the Catholic point of view, Sean Whittle engages with important debates and questions concerning the nature and purpose of Catholic education and schooling. The book opens with a review of the criticisms that have emerged about the prevalence of Catholic schools within the state system and, indeed, about the very notion of there being such a thing as 'Catholic education'. The author then goes on to survey official Church teaching on education and the work of key Catholic thinkers, Newman and Maritain, before moving on to discuss the writings of Karl Rahner, a leading twentieth century theologian. *A Theory of Catholic Education* argues that Rahner's approach, with his focus on the place of mystery in human experience, provides a way forward. Ultimately, Whittle demonstrates how Catholic theology can offer a unique and much needed theory of education.

**Faith-based Identity and Curriculum in Catholic Schools**

Jim Gleeson 2019-12-13 *Faith-based Identity and Curriculum in Catholic Schools* examines the relationship between faith-based education and whole curriculum at a time when neoliberal ideologies and market values are having a disproportionate influence on national education policies. Topics addressed include: current challenges and dilemmas faced by Catholic Education leadership; Catholic social teaching and its implications for whole curriculum; the opinions of teachers in Queensland Catholic schools regarding faith-based school identity with particular reference to whole curriculum; an associated comparison of these opinions teachers with those of their USA peers; school identity and Catholic social teaching in Ontario Catholic schools; an action research approach to the integration of Catholic social teaching in Queensland Catholic schools; longitudinal study of the views of pre-service teachers at a Catholic university regarding the purposes and characteristics of Catholic schools. Bringing together professionals and academics from across the world, *Faith-based Identity and Curriculum in Catholic Schools* will inspire Catholic and other faith-based educators to appreciate the importance and potential of the integration of faith-based perspectives such as countercultural Catholic social teaching across the school curriculum in an educationally appropriate manner.

**International Explorations of Contemplative Leadership in Catholic Education** Merylann "Mimi" J. Schuttloffel 2019-04-17 This book highlights the model of contemplative Catholic school leadership as an influence on faith-formation cultures within the Catholic school, and it demonstrates the impact of cultural factors on Catholic identity formation. By integrating reflection and Catholic values with a leader's decision-making process, the model described in this volume seeks coherence between the leader's faith beliefs and their behaviors. Including five unique, international case studies, this research emphasizes the character of the school leader--including faith identity--as the principal architect of the school's culture.

**A History of Canadian Catholics** Terence J. Fay 2002 A history of the first 400 years of Catholic life in Canada.

**New Thinking, New Scholarship and New Research in Catholic Education** Sean Whittle 2021-08-03 New Thinking, New Scholarship and New Research in Catholic Education gives a forum to many established and leading scholars to review and critically appraise the research contribution of Gerald Grace to Catholic education. The book demonstrates the way in which the field of Catholic Education Studies has developed under the influence of Grace, to become internationally recognised. This book demonstrates the ways in which Gerald Grace has shaped Catholic education since 1997. This begins with the primacy of empirical study and carefully conducted fieldwork when researching Catholic education. Many contributors focus on the way Grace champions the alignment between Catholic education and what we have come to know as the option for the poor. The collection also reflects Grace's intention to ensure the voices of women are properly represented in the field of Catholic education. The book is based on an inclusive and open principle that seeks to establish dialogue with educators of different faiths and different religious backgrounds, as well as secular and humanist critics. It will be of great interest to academics, scholars and students of religious education, the history of education and all those interested in the developing field of Catholic Education Studies. The Open Access version of this book, available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

**Gender, Policy and Educational Change** Sheila Riddell 2003-05-20 Gender equality has been a major educational theme for the past two decades and has become interwoven with other policy themes, including those of marketisation and managerialism. Contributors to this strong collection are key researchers in their fields and seek to address the following questions: \* What patterns are discernible in the educational attainment of girls and boys over the past two decades? \* To what extent are changes attributable to gender equality policies? \* What form have gender equality policies taken in different parts of the UK? \* What has been the impact of European equality policies? \* How have gender equality policies been experienced by particular groups including pupils from ethnic minority and working-class backgrounds? This book aims to take an overall look at how significant have been the changes in experiences, aspirations and culture of girls and boys and male and female teachers. It explores how attempts to improve equal opportunities in education have fared and examines the tensions and contradictions in recent policies.

**Irish and British Reflections on Catholic Education** Sean

Whittle 2021-02-20 This volume presents an interdisciplinary and systematic review of Catholic Education Studies across Ireland and Britain. Taken together, the chapters drill down to the foundations, identity and leadership matters in Catholic education and schools. It is in reading the complete volume that a more precise picture of Catholic education in Ireland and Britain develops into sharper focus. This is important because it reflects and crystallises the complexity which has almost organically developed within the field of Catholic Education Studies. It also provides a powerful antidote to the naïve reductionism that would boil Catholic education down to just one or two fundamental issues or principles. Contemporary Catholic education, perhaps globally but certainly in Ireland and Britain, is best depicted in terms of being a colourful kaleidoscope of differing perspectives. However this diversity is ultimately grounded in the underlying unity of purpose, because each of the contributors to this volume is a committed advocate of Catholic education. The volume brings together a rich range of scholars into one place, so that these voices can be listened to as a whole. It includes contributions from leading scholars, blended with a plethora of other voices who are emerging to become the next generation of leading researchers in Catholic education. It also introduces a number of newer voices to the academic context. They present fresh perspectives and thinking about matters relating to Catholic education and each of them confidently stand alongside the other contributors. Moreover, these reflections on Catholic education are important fruits to have emerged from the collaboration made possible through the creation of the Network for Researchers in Catholic Education, which was established in 2016 under the auspices of Heythrop College, University of London.

**Religious Leadership** Sharon Henderson Callahan 2013-05-20 This 2-volume set within The SAGE Reference Series on Leadership tackles issues relevant to leadership in the realm of religion. Topics are examined from multiple perspectives, traditions, and faiths. Features & Benefits: By focusing on key topics with 100 brief chapters, we provide students with more depth than typically found in encyclopedia entries but with less jargon or density than the typical journal article or research handbook chapter. Signed chapters are written in language and style that is broadly accessible. A detailed index, cross-references between chapters, and an online version enhance accessibility for today's student audience.

**Catholic Schools and the Future of the Church** Kathleen Engebretson 2014-02-27 During the first decade of the 21st century the Catholic Church in the developed world has faced a decline in its moral authority, increasing accusations of irrelevance to a secular age, and a steep and steady decline in commitment among successive generations from the 1960s on. Despite this Catholic schools have multiplied and grown in popularity and educational achievement. The book sets out a programme for the contribution of Catholic schools to the future of the Church, covering such topics as the religious education curriculum in its cognitive and affective aspects, the sacramental life of the school, selection of staff, the issue of staff and Catholic witness and many other topics. Engebretson argues that Catholic schools are a powerful key to the future of the Church and shows how, within their diversity, Catholic schools can be ecclesial communities, which have at their heart the building up of the Church.

**Religious Schools in the United States K-12 (1993)** Thomas C. Hunt 2017-12-15 First published in 1993 this volume is an extension and revision of the 1986 book entitled *Religious Schools in America: A Selected Bibliography*. This new version contains additional annotated bibliographies of the various denominational schools as well as discussing governmental relation to each setting in the years from 1985 to 1992. This version also covers Greek Orthodox and Muslim schools that were not part of the previous volume and includes a

chapter on the growth of home schooling which is often influenced by religion. Finally, unlike the previous edition, this book only considers religious schools, rather than the religious aspect or function of public

schooling. Each section includes a short chapter followed by an extensive annotated bibliography making it a useful source for anyone looking for information in the area.
