It is your completely own time to deed reviewing habit. among guides you could enjoy now is **Dragon Rises Red Bird Flies Psychology Amp Chinese Medicine Leon Hammer** below.

The Lost Symbol Dan Brown 2010 The most anticipated publication of the decade, The Lost Symbol is the stunning new thriller featuring Robert Langdon. **The Shining Girls** Lauren Beukes 2013-04-25 The jaw-dropping, page-turning, critically-acclaimed book of the year: a serial-killer thriller unlike any other from the award-winning Lauren Beukes. ‘GONE GIRL has not exactly gone. But THE SHINING GIRLS have arrived’ (The Times).

Covet J.R. Ward 2009-09-29 From the #1 New York Times bestselling author of the Black Dagger Brotherhood series comes the first Novel of the Fallen Angels. Redemption isn’t a word Jim Heron knows much about—his specialty is revenge, and to him, sin is all relative. But everything changes when he becomes a fallen angel and is charged with saving the souls of seven people from the seven deadly sins. And failure is not an option. Vin diPietro surrendered himself to his business—until fate intervenes in the form of a tough-talking, Harley-riding, self-professed savior, and a woman who makes him question his destiny. With an ancient evil ready to claim him, Vin has to work with a fallen angel not only to win his beloved over...but redeem his very soul.

The Girl of Fire and Thorns Rae Carson 2011-09-20 “Rae Carson has proved she’s a master and has shaken up the YA genre.”—USAToday.com The first book in Rae Carson’s award-winning and New York Times–bestselling trilogy! The Girl of Fire and Thorns is a sweeping journey full of adventure, sorcery, heartbreak, and power. Fans of George R. R. Martin’s Game of Thrones and Leigh Bardugo’s Grishaverse will devour this fantasy series. Once a century, one person is chosen for greatness. Elisa is the chosen one. But she has always felt powerless, useless. Now, on her sixteenth birthday, she has become the secret wife of a handsome and worldly king—a king whose country is in turmoil. A king who needs her to be the chosen one, not a failure of a princess. And he's not the only one who seeks her. Fierce enemies, seething with dark magic, are hunting her. A daring, determined revolutionary thinks she could be his people's savior. Soon it is not just her life, but her very heart that is at stake. Elisa could be everything to those who need her most. If the prophecy is fulfilled. If she finds the power deep within herself. If she doesn't die young. Most of the chosen do. William C. Morris YA Debut Award Finalist YALSA Best Fiction for Young Adults Top Ten Pick Andre Norton Award Finalist A Texas Tayshas Selection Ohioana Book Award YA winner Don’t miss The Empire of Dreams, Rae Carson’s action-packed return to the world of The Girl of Fire and Thorns!

Sacred Natural Sites Bas Verschuuren 2012-06-25 Sacred Natural Sites are the world's oldest protected places. This book focuses on a wide spread of both iconic and lesser known examples such as sacred groves of the Western Ghats (India), Sagarmatha /Chomolongma (Mt Everest, Nepal, Tibet - and China), the Golden Mountains of Altai (Russia), Holy Island of Lindisfarne (UK) and the sacred lakes of the Niger Delta (Nigeria). The book illustrates that sacred natural sites, although often under threat, exist within and outside formally recognised protected areas, heritage sites. Sacred natural sites may well be some of the last strongholds for building resilient networks of connected landscapes. They also form important nodes for maintaining a dynamic socio-cultural fabric in the face of global change. The diverse authors bridge the gap between approaches to the conservation of cultural and biological diversity by taking into account cultural and spiritual values together with the socio-economic interests of the custodian communities and other relevant stakeholders.

Understanding Media Marshall McLuhan 2016-09-04 When first published, Marshall McLuhan's Understanding Media made history with its radical view of the effects of electronic communications upon man and life in the twentieth century.

Signs and Symbols Adrian Frutiger 1998 Discusses the elements of a sign, and looks at pictograms, alphabets, calligraphy, monograms, text type, numerical signs, symbols, and trademarks

Bio-Inspired Innovation and National Security National Defense University 2010-10-01 Despite the vital importance of the emerging area of biotechnology and its role in defense planning and policymaking, no definitive book has been written on the topic for the defense policymaker, the military student, and the private-sector bioscientist interested in the "emerging opportunities market" of national security. This edited volume is intended to help close this gap and provide the necessary backdrop for thinking strategically about biology in defense planning and policymaking. This volume is about applications of the biological sciences, here called "biologically inspired innovations," to the military. Rather than treating biology as a series of threats to be dealt with, such innovations generally approach the biological sciences as a set of opportunities for the military to gain strategic advantage over adversaries. These opportunities range from looking at everything from genes to brains, from enhancing human performance to creating renewable energy, from sensing the environment around us to harnessing its power.

The Theory Of Celestial Influence Rodney Collin 2019-01-15 Before Paulo Coelho and Eckhart Tolle came Rodney Collin. A huge 466 page book full of essential knowledge. How To Become Supernatural Man, The Universe and Cosmic Mystery is an exploration of the universe and man's place in it. Rodney Collin examines 20th-century scientific discoveries and traditional esoteric teachings and concludes that the driving force behind everything is neither procreation nor survival, but expansion of awareness. Collin sets out to reconcile the considerable contradictions of the rational and imaginative minds and of the ways we see the external world versus our inner selves. For readers familiar with Gurdjieff's cosmology will here find further examinations of the systems outlined in by Ouspensky in Search of the Miraculous.

Fire in His Kiss Ruby Dixon 2017-04-10 Bloodlust and insanity rule my existence. As a fierce drakoni warrior, this strange new world I find myself in eats at my mind until there is nothing left. There is no light or clarity...until she arrives. I save her life, plucking her from the sky.From that point on, she is mine.But the human I have chosen for my mate - Sasha - is fragile and wounded. She does not trust me and fears my presence. I will not give up, though. I will do anything to give her my fires and bond us both in body and spirit. How can I convince her that I want nothing more than her happiness if she will not let me touch her?How does a dragon woo a human?

A History of the Behavioral Therapies William O'Donohue 2001-04-01 In this unique work, eighteen of the most influential and significant figures in the various subareas of behavior therapy (from behavior analysis through cognitive therapy) are brought together to discuss their work and the sources and influences that affected it. At times moving, profound, and humorous, it casts a new and perhaps more human light on the most influential movement in behavioral health in the latter part of the 20th century. These intellectual biographies range in tone and intensity as each author uses their own particular style to convey their views about the field and their individual impact on it. For those interested in the behavioral and cognitive movement, this book is a must have since it is the only book to have chronicled the individual histories of the founders of the applied behavioral movement before they are lost forever.

Mythic Imagination Today Terry Marks-Tarlow 2021-01-18 Mythic Imagination Today is an illustrated guide to the interpenetration of mythology and science throughout the ages. This monograph brings alive our collective need for story as a guide to the rules, roles, and relationships of everyday life.

Zoo Animal Learning and Training Vicky A. Melfi 2020-02-18 Comprehensively explains animal learning theories and current best practices in animal training within zoos This accessible, up-to-date book on animal training in a zoo/aquaria context provides a unified approach to zoo animal learning, bringing together the art and science of animal training. Written by experts in academia and working zoos, it incorporates the latest information from the scientific community along with current best practice, demystifying the complexities of training zoo animals. In doing so, it teaches readers how to effectively train animals and to fully understand the consequences of their actions. Zoo Animal Learning and Training starts with an overview of animal learning theory. It describes the main categories of animal learning styles; considers the diverse natural history of zoo animals; reviews the research undertaken which

demonstrates ultimate benefits of learning; and highlights the advantages and disadvantages of the different approaches. It also shows how the direct application of learning theory can be integrated into zoo animal management; discusses how other factors might affect development; and investigates situations and activities from which animals learn. It also explores the theoretical basis that determines whether enrichments are successful. Provides an easily accessibly, jargon-free introduction to the subject Explores different training styles, providing theoretical background to animal learning theory as well as considerations for practical training programme - including how to set them up, manage people and animals within them and their consequences Includes effective skills and ‘rules of thumb’ from professional animal trainers Offers commentary on the ethical and welfare implications of training in zoos Features contributions from global experts in academia and the zoo profession Uniquely features both academic and professional perspectives Zoo Animal Learning and Training is an important book for students, academics and professionals. Suited to senior undergraduate students in zoo biology, veterinary science, and psychology, and for post-graduate students in animal management, behaviour and conservation, as well as zoo biology. It is also beneficial to those working professionally in zoos and aquaria at different levels.

Invisible Women Caroline Criado Perez 2019-03-07 *THE SUNDAY TIMES NUMBER ONE BESTSELLER* 'HELL YES. This is one of those books that has the potential to change things - a monumental piece of research' Caitlin Moran Imagine a world where... · Your phone is too big for your hand · Your doctor prescribes a drug that is wrong for your body · In a car accident you are 47% more likely to be injured. If any of that sounds familiar, chances are you're a woman. From government policy and medical research, to technology, workplaces, and the media. Invisible Women reveals how in a world built for and by men we are systematically ignoring half of the population, often with disastrous consequences. Caroline Criado Perez brings together for the first time an impressive range of case studies, stories and new research from across the world that illustrate the hidden ways in which women are forgotten, and the profound impact this has on us all. Discover the shocking gender bias that affects our everyday lives. 'A book that changes the way you see the world' Sunday Times 'Revelatory, frightening, hopeful' Jeanette Winterson

The Power of One Bryce Courtenay 2011-03-30 In 1939, hatred took root in South Africa, where the seeds of apartheid were newly sown. There a boy called Peekay was born. He spoke the wrong language–English. He was nursed by a woman of the wrong color–black. His childhood was marked by humiliation and abandonment. Yet he vowed to survive–he would become welterweight champion of the world, he would dream heroic dreams. But his dreams were nothing compared to what awaited him. For he embarked on an epic journey, where he would learn the power of words, the power to transform lives, and the mystical power that would sustain him even when it appeared that villainy would rule the world: The Power of One.

Science Fiction and Psychology Gavin Miller 2020-01-31 The psychologist may appear in science fiction as the herald of utopia or dystopia; literary studies have used psychoanalytic theories to interpret science fiction; and psychology has employed science fiction as an educational medium. Science Fiction and Psychology goes beyond such incidental observations and engagements to offer an in-depth exploration of science fiction literature's varied use of psychological discourses, beginning at the birth of modern psychology in the late nineteenth century and concluding with the ascendance of neuroscience in the late twentieth century. Rather than dwelling on psychoanalytic readings, this literary investigation combines with history of psychology to offer attentive textual readings that explore five key psychological schools: evolutionary psychology, psychoanalysis, behaviourism, existential-humanism, and cognitivism. The varied functions of psychological discourses in science fiction are explored, whether to popularise and prophesy, to imagine utopia or dystopia, to estrange our everyday reality, to comment on science fiction itself, or to abet (or resist) the spread of psychological wisdom. Science Fiction and Psychology also considers how psychology itself has made use of science fiction in order to teach, to secure legitimacy as a discipline, and to comment on the present.

The Brain That Changes Itself Norman Doidge 2008-08-07 OVER ONE MILLION COPIES SOLD 'A remarkable and hopeful portrait of the endless adaptability of the human brain' Oliver Sacks 'Utterly wonderful . . . without question one of the most important books about the brain you will ever read; yet it is beautifully written, immensely approachable, and full of humanity' Iain McGilchrist MA, author of The Master and His Emissary Meet the ninety-year-old doctor who is still practicing medicine, the stroke victim who learned to move and talk again and the woman with half a brain that rewired itself to work as a whole. All these people had their lives transformed by the remarkable discovery that our brains can repair themselves through the power of positive thinking. Here bestselling author, psychiatrist and psychoanalyst Norman Doidge reveals the secrets of the cutting-edge science of 'neuroplasticity'. He introduces incredible case histories - blind people helped to see, IQs raised and memories sharpened - and tells the stories of the maverick scientists who are overturning centuries of assumptions about the brain. This inspiring book will leave you with a sense of wonder at the capabilities of the mind, and the self-healing power that lies within all of us.

The Virtual Community, revised edition Howard Rheingold 2000-10-23 Howard Rheingold tours the "virtual community" of online networking. Howard Rheingold has been called the First Citizen of the Internet. In this book he tours the "virtual community" of online networking. He describes a community that is as real and as much a mixed bag as any physical community—one where people talk, argue, seek information, organize politically, fall in love, and dupe others. At the same time that he tells moving stories about people who have received online emotional support during devastating illnesses, he acknowledges a darker side to people's behavior in cyberspace. Indeed, contends Rheingold, people relate to each other online much the same as they do in physical communities. Originally published in 1993, The Virtual Community is more timely than ever. This edition contains a new chapter, in which the author revisits his ideas about online social communication now that so much more of the world's population is wired. It also contains an extended bibliography.

Edible Insects Arnold van Huis 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Timelines of Nearly Everything Manjunath.R 2021-07-03 This book takes readers back and forth through time and makes the past accessible to all families, students and the general reader and is an unprecedented collection of a list of events in chronological order and a wealth of informative knowledge about the rise and fall of empires, major scientific breakthroughs, groundbreaking inventions, and monumental moments about everything that has ever happened.

Infinite Jest David Foster Wallace 2011-04-14 'A writer of virtuostic talents who can seemingly do anything' New York Times 'Wallace is a superb comedian of culture . . . his exuberance and intellectual impishness are a delight' James Wood, Guardian 'He induces the kind of laughter which, when read in bed with a sleeping partner, wakes said sleeping partner up . . . He's damn good' Nicholas Lezard, Guardian 'One of the best books about addiction and recovery to appear in recent memory' Sunday Times Somewhere in the not-so-distant future the residents of Ennet House, a Boston halfway house for recovering

addicts, and students at the nearby Enfield Tennis Academy are ensnared in the search for the master copy of Infinite Jest, a movie said to be so dangerously entertaining its viewers become entranced and expire in a state of catatonic bliss . . .

12 Rules for Life Jordan B. Peterson 2018-01-23 #1 NATIONAL BESTSELLER #1 INTERNATIONAL BESTSELLER What does everyone in the modern world need to know? Renowned psychologist Jordan B. Peterson's answer to this most difficult of questions uniquely combines the hard-won truths of ancient tradition with the stunning revelations of cutting-edge scientific research. Humorous, surprising and informative, Dr. Peterson tells us why skateboarding boys and girls must be left alone, what terrible fate awaits those who criticize too easily, and why you should always pet a cat when you meet one on the street. What does the nervous system of the lowly lobster have to tell us about standing up straight (with our shoulders back) and about success in life? Why did ancient Egyptians worship the capacity to pay careful attention as the highest of gods? What dreadful paths do people tread when they become resentful, arrogant and vengeful? Dr. Peterson journeys broadly, discussing discipline, freedom, adventure and responsibility, distilling the world's wisdom into 12 practical and profound rules for life. 12 Rules for Life shatters the modern commonplaces of science, faith and human nature, while transforming and ennobling the mind and spirit of its readers.

Human Systems Engineering and Design III Waldemar Karwowski 2020-08-29 This book focuses on novel design and systems engineering approaches, including theories and best practices, for promoting a better integration of people and engineering systems. It covers a range of innovative topics related to: development of human-centered systems; interface design and human-computer interaction; usability and user experience; innovative materials in design and manufacturing; biomechanics and physical rehabilitation, as well as safety engineering and systems complexity. The book, which gathers selected papers presented at the 3rd International Conference on Human Systems Engineering and Design: Future Trends and Applications (IHSED 2020), held on September 22-24, 2020, at Juraj Dobrila University of Pula, in Pula, Croatia, provides researchers and practitioners with a snapshot of the state-of-the-art and current challenges in the field of human systems engineering and design.

The Element Encyclopedia of Secret Signs and Symbols: The Ultimate A-Z Guide from Alchemy to the Zodiac Adele Nozedar 2010-01-21 Unlock the lost and hidden meanings of the world's ancient and modern signs and symbols with the latest in the hugely popular series of 'Element Encyclopedias'. This is the biggest A-Z reference book on symbolic objects you'll ever find.

Understanding Philosophy of Science James Ladyman 2012-08-06 Few can imagine a world without telephones or televisions; many depend on computers and the Internet as part of daily life. Without scientific theory, these developments would not have been possible. In this exceptionally clear and engaging introduction to philosophy of science, James Ladyman explores the philosophical questions that arise when we reflect on the nature of the scientific method and the knowledge it produces. He discusses whether fundamental philosophical questions about knowledge and reality might be answered by science, and considers in detail the debate between realists and antirealists about the extent of scientific knowledge. Along the way, central topics in philosophy of science, such as the demarcation of science from non-science, induction, confirmation and falsification, the relationship between theory and observation and relativism are all addressed. Important and complex current debates over underdetermination, inference to the best explanation and the implications of radical theory change are clarified and clearly explained for those new to the subject.

What Happened Hillary Rodham Clinton 2017-09-12 “An engaging, beautifully synthesized page-turner” (Slate). The #1 New York Times bestseller and Time #1 Nonfiction Book of the Year: Hillary Rodham Clinton’s most personal memoir yet, about the 2016 presidential election. In this “candid and blackly funny” (The New York Times) memoir, Hillary Rodham Clinton reveals what she was thinking and feeling during one of the most controversial and unpredictable presidential elections in history. She takes us inside the intense personal experience of becoming the first woman nominated for president by a major party in an election marked by rage, sexism, exhilarating highs and infuriating lows, stranger-than-fiction twists, Russian interference, and an opponent who broke all the rules. “At her most emotionally raw” (People), Hillary describes what it was like to run against Donald Trump, the mistakes she made, how she has coped with a shocking and devastating loss, and how she found the strength to pick herself back up afterward. She tells readers what it took to get back on her feet—the rituals, relationships, and reading that got her through, and what the experience has taught her about life. In this “feminist manifesto” (The New York Times), she speaks to the challenges of being a strong woman in the public eye, the criticism over her voice, age, and appearance, and the double standard confronting women in politics. Offering a “bracing... guide to our political arena” (The Washington Post), What Happened lays out how the 2016 election was marked by an unprecedented assault on our democracy by a foreign adversary. By analyzing the evidence and connecting the dots, Hillary shows just how dangerous the forces are that shaped the outcome, and why Americans need to understand them to protect our values and our democracy in the future. The election of 2016 was unprecedented and historic. What Happened is the story of that campaign, now with a new epilogue showing how Hillary grappled with many of her worst fears coming true in the Trump Era, while finding new hope in a surge of civic activism, women running for office, and young people marching in the streets.

Picture-Book Professors Melissa Terras 2018-10-31 How is academia portrayed in children's literature? This Element ambitiously surveys fictional professors in texts marketed towards children, who are overwhelmingly white and male, tending to be elderly scientists. Professors fall into three stereotypes: the vehicle to explain scientific facts, the baffled genius, and the evil madman. By the late twentieth century, the stereotype of the male, mad, muddlehead, called Professor SomethingDumb, is formed in humorous yet pejorative fashion. This Element provides a publishing history of the role of academics in children’s literature, questioning the book culture which promotes the enforcement of stereotypes regarding intellectual expertise in children’s media. This title is also available, with additional material, as Open Access.

Sex and Behavior McGill 2013-06-29 Discussion of the precise nature and position of boundaries between disciplines is nearly always counterproductive; the need is usually to cross them not to emphasize them. And any such discussion of the distinction between ethology and comparative psychology would today seem patently absurd. While there may be differences in outlook, no boundaries exist. But when Frank Beach started in research, that was not the case. Comparative psychology flourished in the United States whereas ethology was unknown. Beach started as a comparative psychologist and has always called himself either that or a behavioral endocrinologist. Yet, among the comparative psychologists of his generation, he has had closer links with the initially European ethologists than almost any other. He was indeed one of the editors of the first volume of Behaviour. That this should have been so is not surprising once one knows that his Ph. D. thesis concerned “The Neural Basis for Innate Behavior,” that he used to sleep in the laboratory so that he could watch mother rats giving birth, and that in 1935 he was using model young to analyze maternal behavior. Furthermore, for nine years he worked in the American Museum of Natural History-in a department first named Experimental Biology and later, when Beach had saved it from extinction and become its

chairman, the Department of Animal Behavior. It was in 1938, during Frank's time at the American Museum, that he was first introduced to Niko Tinbergen by Ernst Mayr.

Science Comics: Robots and Drones Mairghread Scott 2018-03-27 In factories! In the sky! In your cars and phones! In your own home! Robots are everywhere! And they have been for a lot longer than you might realize. From tea-serving robots in feudal Japan to modern rovers exploring Mars, robots have been humanity’s partners, helpers, and protectors for centuries! Join one of the world’s earliest robots, a mechanical bird named Pouli, as he explores where robots came from, how they work, and where they’re going in this informative and hilarious new book! Ever dreamt of building your own best friend? It might be easier than you think! Every volume of Science Comics offers a complete introduction to a particular topic—dinosaurs, coral reefs, the solar system, volcanoes, bats, flying machines, and more. These gorgeously illustrated graphic novels offer wildly entertaining views of their subjects. Whether you’re a fourth grader doing a natural science unit at school or a thirty year old with a secret passion for airplanes, these books are for you!

The Second Self Sherry Turkle 1985 Examines the effect of the new "computer culture" on both children and adults and theorizes that computers are responsible for the new wave of mechanical determinism and a revival of mysticism and spirituality
Apollo's Warriors Michael E. Haas 1998-05 Presenting a fascinating insider's view of U.S.A.F. special operations, this volume brings to life the critical contributions these forces have made to the exercise of air & space power. Focusing in particular on the period between the Korean War & the Indochina wars of 1950-1979, the accounts of numerous missions are profusely illustrated with photos & maps. Includes a discussion of AF operations in Europe during WWII, as well as profiles of Air Commandos who performed above & beyond the call of duty. Reflects on the need for financial & political support for restoration of the forces. Bibliography. Extensive photos & maps. Charts & tables.

Positive Psychology at the Movies Ryan M Niemiec 2013 For educators, practitioners, researchers, and everyone striving for personal growth and a fulfilling life! This completely revised edition of a classic in the field provides a unique way to learn about positive psychology and what is right and best about human beings. Positive Psychology at the Movies now reviews nearly 1,500 movies, includes dozens of evocative film images, and is replete with practical aids to learning. Positive psychology is one of the most important modern developments in psychology. Films brilliantly illustrate character strengths and other positive psychology concepts and inspire new ways of thinking about human potential. Positive Psychology at the Movies uses movies to introduce the latest research, practices, and concepts in this field of psychology. This book systematically discusses each of the 24 character strengths, balancing film discussion, related psychological research, and practical applications. Practical resources include a syllabus for a positive psychology course using movies, films suitable for children, adolescents, and families, and questions likely to inspire classroom and therapy discussions. Positive Psychology at the Movies was written for educators, students, practitioners, and researchers, but anyone who loves movies and wants to change his or her life will find it inspiring and relevant. Watching the movies recommended in this book will help the reader practice the skill of strengths-spotting in themselves and others and support personal growth and self-improvement. Read this book to learn more about positive psychology - and watch these films to become a better person!

Lion and Dragon in Northern China Reginald Fleming Johnston 2018-09-20 Reproduction of the original: Lion and Dragon in Northern China by Reginald Fleming Johnston

Extinctions Josephine Wilson 2018-07-05 Professor Frederick Lothian, retired engineer, world expert on concrete and connoisseur of modernist design, has quarantined himself from life by moving to a retirement village. Surrounded and obstructed by the debris of his life, he is determined to be miserable, but is tired of his existence and of the life he has chosen. When a series of unfortunate incidents forces him and his neighbour, Jan, together, he begins to realise the damage done by the accumulation of a lifetime's secrets and lies, and to comprehend his own shortcomings. Finally, Frederick Lothian has the opportunity to build something meaningful for the ones he loves. Humorous, poignant and galvanising, this is a novel about all kinds of extinction - natural, racial, national and personal - and what we can do to prevent them.

Color Design Workbook Terry Lee Stone 2008-03 Presents information on the fundamentals of graphic design and color theory, providing tips on ways to talk to clients about color and how to use color in presentations.

Jung Lexicon Daryl Sharp 1991 "Illustrates the broad scope of analytical psychology and the interrelationship of Jung's cultural, scientific and clinical work. Definitions are accompanied by choice extracts from Jung's Collected Works, with informed commentary and generous crossreferences."--

Short Essays Gerald Levin 1989

Jay's Journal Anonymous 2012-09-25 A withdrawn adolescent boy's initiation into the occult draws him ever deeper into the bizarre world of witchcraft, voodoo, and satanism until, at age sixteen, he commits suicide.

Dark Challenge Christine Feehan 2010-12-21 Julian Savage was golden. Powerful. But tormented. For the brooding hunter walked alone. Always alone, far from his Carpathian kind, alien to even his twin. Like his name, his existence was savage. Until he met the woman he was sworn to protect.... When Julian heard Desari sing, rainbows swamped his starving senses. Emotions bombarded his hardened heart. And a dark hunger to possess her flooded his loins, blinding him to the danger stalking him. And even as Desari enflamed him, she dared to defy him - with mysterious, unparalleled feminine powers. Was Desari more than his perfect mate? Julian had met his match in this woman, but would she drive him to madness...or save his soul?

The Magician's Land Lev Grossman 2014-08-05 The stunning conclusion to the #1 New York Times bestselling Magicians trilogy, now an original series on SYFY #1 NEW YORK TIMES BESTSELLER A NEW YORK TIMES NOTABLE BOOK OF THE YEAR ONE OF THE YEAR’S BEST BOOKS The San Francisco Chronicle • Salon • The Christian Science Monitor • AV Club • Buzzfeed • Kirkus • NY 1 • Bustle • The Globe and Mail Quentin Coldwater has been cast out of Fillory, the secret magical land of his childhood dreams. With nothing left to lose he returns to where his story began, the Brakebills Preparatory College of Magic. But he can’t hide from his past, and it’s not long before it comes looking for him. Along with Plum, a brilliant young undergraduate with a dark secret of her own, Quentin sets out on a crooked path through a magical demimonde of gray magic and desperate characters. But all roads lead back to Fillory, and his new life takes him to old haunts, like Antarctica, and to buried secrets and old friends he thought were lost forever. He uncovers the key to a sorcery masterwork, a spell that could create magical utopia, a new Fillory—but casting it will set in motion a chain of events that will bring Earth and Fillory crashing together. To save them he will have to risk sacrificing everything. The Magician’s Land is an intricate thriller, a fantastical epic, and an epic of love and redemption that brings the Magicians trilogy to a magnificent conclusion, confirming it as one of the great achievements in modern fantasy. It’s the story of a boy becoming a man, an apprentice becoming a master, and a broken land finally becoming whole.
