Carrying Coal to Columbus David Meyers
2017-02-13 As early as 1755, explorers found
coal deposits in Ohio's Hocking Valley. The
industry that followed created towns and canals
and established a new way of life. The first
shipment of coal rolled into Columbus in 1830
and has continued ever since. In 1890, the
United Mine Workers of America was founded in
Columbus. Lorenzo D. Poston became the first of
the Hocking Valley coal barons, and by the start
of the twentieth century, at least fifty thousand
coal miners and their families lived and worked
in Athens, Hocking and Perry Counties. Authors
David Meyers, Elise Meyers Walker and Nyla
Vollmer detail the hard work and struggles as
they unfolded in Ohio's capital and the Little
Cities of Black Diamonds.

Power Up Your Mind Bill Lucas 2011-07-12 Bill
Lucas, a leading international expert on life-long
learning, shows that while we have learned more
about how the brain works in the last decade
than we have ever known, only a fraction of this
is grasped and applied by most people. Power
Up Your Mind applies this practical knowledge
for the first time and shows you how to learn.
Drawing on research from a wide variety of

subject areas, from neuroscience to psychology, from motivation theory to accelerated learning, from memory to diet, this book shows how everyone has the capacity to succeed and how most people use only a very small portion of their talents. For learning to be effective, an understanding of how the brain works is essential and unlike most of the recent thinking on the mind, Lucas connects an understanding of the brain with the reality of the workplace and

translates what we know about the brain into useful insights for work. Much work-based training is a waste of time and money because the majority of people are neither emotionally ready nor practically inclined to apply their learning to the way they behave. Power Up Your Mind offers a new model of learning-READY, GO, STEADY-which will revolutionize the way you learn and perform.
