Assessing Second Language Reading
Karim Sadeghi 2021-08-25 This book investigates the issue of cloze-validity as a measure of second language reading comprehension. It starts off by making a distinction between general reading ability and the more specific reading comprehension followed by a thorough review of the related research on L2 reading comprehension and sorting out the confusion in the literature in this categorization. A comprehensive account of cloze procedure is presented discussing its origin, different versions, its use for teaching and testing purposes, as well the latest research on cloze as measures of readability, language proficiency and second language reading. The book includes studies conducted at several stages on validating cloze as a measure of reading and interview and questionnaire techniques are applied to investigate the validity of eight cloze tests, criterion reading tests, and other cloze and reading tests in general. Two new cloze tests, i.e. reader-centered cloze test and phrase cloze test, are also introduced and researched as measures of reading ability. The book concludes with suggestions for developing tests that can better measure reading comprehension in light of recent research insights on the complex and dynamic nature of reading. This book will appeal to researchers, lecturers and graduate and post-graduate

students taking a course in Second Language Acquisition, Applied Linguistics, TESOL, Language Assessment, and Educational Measurement.

A Qualitative Approach to the Validation of Oral Language Tests

Anne Lazaraton 2002-07-18 Language testers have generally come to recognize the limitations of traditional statistical methods for validating oral language tests. They have begun to consider more innovative approaches to test validation, approaches that promise to illuminate the assessment process itself, rather than just assessment outcomes (i.e., ratings). One such approach is conversation analysis (or CA), a rigorous empirical methodology developed by sociologists, which employs inductive methods in order to discover and describe the recurrent, systematic properties of conversation, including sequential organization, turn-taking, repair, preference structure, and topic management. CA offers a systematic approach for analysing spoken interaction from a qualitative perspective, allowing one to make observations about a stretch of talk while at the same time interacting with it. This book provides language testers with a background in the conversation analytic framework and a fuller understanding of what is entailed in using conversation analysis in the context of oral language test validation.

A Manual for Writers of Research Papers, Theses, and Dissertations, Eighth Edition Kate L. Turabian 2013-04-09 A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become

synonymous with best practices in research writing and style. Her Manual for Writers continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, A Manual for Writers of Research Papers, Theses, and Dissertations has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of The Chicago Manual of Style. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, A Manual for Writers remains the essential resource for students and their teachers.

A Manual for Writers of Research Papers, Theses, and Dissertations, Seventh Edition Kate L. Turabian 2009-08-14 Dewey. Bellow. Strauss. Friedman. The University of Chicago has been the home of some of the most important thinkers of the modern age. But perhaps no name has been spoken with more respect than Turabian. The dissertation secretary at Chicago for decades, Kate Turabian literally wrote the book on the successful completion and submission of the student paper. Her Manual for Writers of Research Papers, Theses, and Dissertations, created from her years of experience with research projects across all fields, has sold more than seven million copies since it was first published in 1937. Now, with this seventh edition, Turabian's Manual has undergone its most extensive revision, ensuring that it will remain the most valuable handbook for writers at every level—from first-year undergraduates, to dissertation writers apprehensively submitting final manuscripts, to senior scholars who may be old hands at research and writing but less familiar with new media citation styles. Gregory G. Colomb, Joseph M. Williams, and the late Wayne C. Booth—the gifted team behind The Craft of Research—and the University of Chicago Press Editorial Staff combined their wide-ranging expertise to remake this classic resource. They preserve Turabian's clear and practical advice while fully embracing the new modes of research, writing, and source citation brought about by the age of the Internet. Booth, Colomb, and

Williams significantly expand the scope of previous editions by creating a guide, generous in length and tone, to the art of research and writing. Growing out of the authors' best-selling Craft of Research, this new section provides students with an overview of every step of the research and writing process, from formulating the right questions to reading critically to building arguments and revising drafts. This leads naturally to the second part of the Manual for Writers, which offers an authoritative overview of citation practices in scholarly writing, as well as detailed information on the two main citation styles ("notes-bibliography" and "author-date"). This section has been fully revised to reflect the recommendations of the fifteenth edition of The Chicago Manual of Style and to present an expanded array of source types and updated examples, including guidance on citing electronic sources. The final section of the book treats issues of style—the details that go into making a strong paper. Here writers will find advice on a wide range of topics, including punctuation, table formatting, and use of quotations. The appendix draws together everything writers need to know about formatting research papers, theses, and dissertations and preparing them for submission. This material has been thoroughly vetted by dissertation officials at colleges and universities across the country. This seventh edition of Turabian's Manual for Writers of Research Papers, Theses, and Dissertations is a classic reference revised for a new

age. It is tailored to a new generation of writers using tools its original author could not have imagined—while retaining the clarity and authority that generations of scholars have come to associate with the name Turabian.

An Investigation Into the Comparability of Two Tests of English as a Foreign Language Lyle F. Bachman 1995-03-16 This book documents a major study comparing the Cambridge First Certificate in English (FCE) with the Test of English as a Foreign Language (TOEFL) to investigate similarities in test content, candidature and use. While both tests were designed to measure many of the same abilities, they represent radically different approaches to language test development, reflecting deeper differences between educational measurement traditions in the US and UK. The thorough investigation of the fundamental characteristics and operational utility of two of the most widely used English tests for foreign students makes this study a valuable contribution to language testing research. As such, it will be of considerable interest to language testing specialists and examination boards, as well as to academic researchers and graduate students in the field of language assessment more generally.

Aligning Tests with the CEFR Waldemar Martyniuk 2010-11-11 The Council of Europe released a preliminary version of the Manual for Relating Language Examinations to the Common European Framework of Reference for Languages (CEFR) in 2003. Over the next 5 years a wide range of institutions and individuals undertook case studies to pilot this draft version. Towards the close of the piloting phase, a two-day colloquium was held in Cambridge, UK enabling pracititioners and academics to reflect on and share their experiences of applying the Manual procedures. Insights from this colloquium informed the Manual revision project during 2008/2009. This volume features selected case studies presented at the Cambridge Colloquium in December 2007. They include the linking of a single test to the CEFR, the CEFR-linking of suites of examinations at different levels and large scale national projects undertaken by examination boards and specialist research institutes. Some studies focus on part of an examination, while others involve all test components. Some apply one or two of the procedures - familiarisation, specification, standardisation, and empirical validation. As well as describing their studies and reporting their

findings. contributors reflect and comment on their experience of using the draft Manual. A clear and comprehensive introductory chapter explains the development of the CEFR and the draft Manual for linking tests, and discusses its relevance for the future. The volume will be of interest to examination boards, language test developers and educational policy-makers, as well as academic lecturers, researchers and graduate students interested in the principles and practice of aligning tests to the CEFR.

Dictionary of Language Testing Alan Davies 1999-04-22 This Dictionary of Language Testing contains some 600 entries on language assessment

Introduction to Applied Linguistics Alan Davies 2007-07-12 This second edition of the foundational textbook An Introduction to Applied Linguistics provides a state-of-the-art account of contemporary applied linguistics. The kinds of language problems of interest to applied linguists are discussed and a distinction drawn between the different research approach taken by theoretical linguists and by applied linguists to what seem to be the same problems. Professor Davies describes a variety of projects which illustrate the interests of the field and highlight the marriage it offers between practical experience and theoretical understanding. The increasing emphasis of applied

linguistics on ethicality is linked to the growth of professionalism and to the concern for accountability, manifested in the widening emphasis on critical stances. This, Davies argues, is at its most acute in the tension between giving advice as the outcome of research and taking political action in order to change a situation which, it is claimed, needs ameliorisation. This dilemma is not confined to applied linguistics and may now be endemic in the applied disciplines.

The Development of IELTS Caroline Clapham 1996-07-11 This book investigates the ESP claim that tertiary level ESL students should be given reading proficiency tests in their own academic subject areas, and studies the effect of background knowledge on reading comprehension.

Performance Testing, Cognition and Assessment University of Cambridge Local Examinations Syndicate 1996 This publication contains a selection of research papers presented at the 15th Annual Language Testing Research Colloquium.This publication contains a selection of research papers presented at the 15th Annual Language Testing Research Colloquium (LTRC). The Colloquium was jointly hosted by the University of Cambridge Local Examinations Syndicate (UCLES) in Cambridge and CITO in Arnhem in the Netherlands. At the Cambridge venue, the papers were presented on the theme of performance testing and at Arnhem, they covered aspects of communication in relation to cognition and assessment. A selection of papers has been made in order to achieve a balanced coverage of these

themes. In particular, the research presented includes work on speaking and writing tests where the focus is on raters and tasks; the application of various statistical methods in language test validation; and issues related to language testing in specific contexts and with particular candidate groups.
Examining Writing Stuart D. Shaw 2007-07-05 This publication highlights the need for test developers to provide clear explanations of the ability constructs which underpin tests offered in the public domain. An explanation is increasingly required, if the validity of test score interpretation and use are to be supported both logically, and with empirical evidence. The book demonstates the application of a comprehensive test validation framework which adopts a socio-cognitive perspective. The framework embraces six core components which reflect the practical nature and quality of an actual testing event. It examines Cambridge ESOL writing tasks from the following perspectives: Test Taker, Cognitive Validity, Context Validity, Scoring Validity, Criterion-related Validity and Consequential Validity. The authors show how an understanding and analysis of the framework and its components in relation to specific writing tests can assist test developers to operationalise their tests more effectively, especially in relation to criterial distinctions across test levels.
Examining Speaking Lynda Taylor 2011-08-25 Test developers need to

provide a clear explication of the language ability constructs that underpin the tests they offer in the public domain; such an explication is essential for supporting claims about the validity --- or usefulness --- of tests and test scores. This edited volume develops a theoretical framework for validating tests of second language speaking ability. The framework is then applied through an examination of the tasks in Cambridge ESOL speaking tests from a number of different validity perspectives that reflect the socio-cognitive nature of any assessment event. The chapter authors show how an understanding and analysis of the framework and its components can assist test developers to operationalise their tests more effectively, especially in relation to the key criteria that differentiate one proficiency level from another. The volume is a rich source of information on all aspects of examining speaking ability. As such, it will be of considerable interest to examination boards who wish to validate their own speaking tests in a systematic and coherent manner, as well as to academic researchers and graduate students in the field of language assessment more generally. This is a companion volume to the previously published titles Examining Writing and Examining Reading.

This volume brings together a set of eight IELTS-related research studies - four on reading and four on listening - conducted between 2005 and 2010. Findings from these studies provide valuable evidence on the validity, reliability, impact and practicality of the IELTS test; they are also instrumental in highlighting aspects needing attention, and thus directly inform the continuing evolution of the IELTS reading and listening tests. The volume reviews and comments on the specific contribution of each study to the ongoing process of IELTS reading and listening test design and development.

Nonverbal Delivery in Speaking Assessment Mingwei Pan 2015-11-27 With an argument for embedding nonverbal delivery in speaking assessment as a point of departure, this book seeks to validate a proposed rating scale for incorporating nonverbal delivery and other conventional dimensions into speaking assessment with a mixed-methods approach. To illustrate the indispensable role of nonverbal delivery in speaking assessment, the book particularly includes snapshots of test-takers' de facto nonverbal delivery, which allow their respective levels to be investigated in a microscopic manner.

Issues in Testing Business English Barry O'Sullivan 2006-01-26 Demand is steadily growing for language tests with a specialized focus which will suit the needs of key professional

domains as diverse as business, law, the airline industry, and teacher education. A range of tests - both past and present - is reviewed, and the development of business English testing at Cambridge ESOL is discussed. The description of the revision of the Business English Certificates (BEC) forms a major part of the book and offers a unique insight into an approach to large-scale ESP test development and revision.

Professional Discourse Kenneth Kong 2014-08-14 "Using a wide range of examples such as research papers, business reports, performance

commentaries, professional guidebooks and legal documents, this book examines the discourse of professional writing. Employing a number of analytic paradigms includingsystemic functional linguistics, pragmatics, text analysis and sociological and anthropological linguistics, the author explores a wide range of professional genres. He argues that while professions use different sets of practices, their use of language displays many universals, and demonstrates this through examples and data from a broad cross section of professional settings such as medicine, law, business, mass media, and engineering. This examination of professional discourse, and its important role in society, will be of interest to researchers in linguistics, applied linguists, and those working on the teaching of English for specific purposes"--
