*Like an Ancient Shrine* Petra Schultheiss 2018-07-16 When Prince Albert died in 1861 at the age of forty-two, his wife Queen Victoria followed this tragic event by an elaborate mourning period in which she surrounded herself as well as her people with memorials of the Prince Consort. Of these, the three most elaborate, the Albert Memorial Chapel, the Royal Mausoleum and the National Memorial to the Prince Consort, all included mosaic decoration. In close connection to current architectural theories such as polychromy or the ideal of the complete decoration as well as the research and experimentation that was carried out with and about the medium mosaic, the memorial mosaics were planned and designed. The medium Queen Victoria chose for these monuments served to underline and strengthen the image of Prince Albert that she created and through this also helped to secure her own claim to power as female sovereign. This book presents an overview of the history of mosaic in England up to the 1860s and a detailed description of the processes of planning and creating the mosaics. Queen Victoria's memorial program as a whole will be described and compared to contemporary mourning rituals as well as British precedents for initiating similar cults.

*The Cosmatesque Mosaics of Westminster Abbey* Warwick Rodwell 2019-11-30 Westminster Abbey contains the only surviving medieval Cosmatesque mosaics outside Italy. They comprise: the 'Great Pavement' in the sanctuary; the pavement around the shrine of Edward the Confessor; the saint's tomb and shrine; Henry III's tomb; the tomb of a royal child, and some other pieces. Surprisingly, the mosaics have never before received detailed recording and analysis, either individually or as an assemblage. The proposed publication, in two volumes, will present a holistic study of this outstanding group of monuments in their historical architectural and archaeological context. The shrine of St Edward is a remarkable survival, having been dismantled at the Dissolution and re-erected (incorrectly) in 1557 under Queen Mary. Large areas of missing mosaic were replaced with plaster on to which mosaic designs were carefully painted. This 16th-century fictive mosaic is unique in Britain. Conservation of the sanctuary pavement was accompanied by full archaeological recording with every piece of mosaic decoration drawn and colored by David Neal, phase plans have been prepared, and stone-by-stone examination undertaken, petrologically identifying and recording the locations of all the materials present. It has revealed that both the pavements and tombs include a range of exotic stone types. The Cosmati study has shed fresh light on every aspect of the unique series of monuments in Westminster Abbey; this work will fill a major lacuna in our knowledge of 13th-century English art of the first rank, and will command international interest.

**Structure and Form in Design** Michael Hann 2014-02-13 This book provides a critical examination of structure and form in design, covering a range of topics of great value to students and practitioners engaged in any of the specialist decorative arts and design disciplines. The complexities of two-dimensional phenomena are explained and illustrated in detail, while various three-dimensional forms are also discussed. In the context of the decorative arts and design, structure is the underlying framework, and form the resultant, visible, two- or three-dimensional outcome of the creative process. Whether hidden or visually detectable in the final design, structure invariably determines whether or not a design is successful in terms of both its aesthetics and its practical performance. Hann successfully identifies various geometric concepts, and presents and discusses a number of simple guidelines to assist the creative endeavours of both accomplished and student practitioners, teachers and researchers.

**Canterbury Cathedral, Trinity Chapel** David S. Neal 2022-09-30 Canterbury Cathedral possesses a unique marble mosaic pavement, dating from the early twelfth century, which has long intrigued scholars and been the subject of speculation and debate. It forms part of the floor of the Trinity chapel, adjacent to the site where the shrine of St Thomas Becket stood, prior to the Reformation. Since the mosaic is older than the chapel itself and partly destroyed a pavement of figurative roundels, laid c. 1215, it must have been moved here from elsewhere in the cathedral. This volume explores the history and archaeology of the Trinity chapel, the pavement and the physical remains of the cult of Becket, based largely on hitherto unrecorded and unpublished evidence. In the early twelfth century, Archbishop Anselm rebuilt the eastern arm of the cathedral, introducing architectural elements from his native Italy, and these included a magnificent mosaic pavement, composed of the most expensive marbles, which lay in front of the high altar. In 1170, Archbishop Becket was murdered in the cathedral, and his body rested overnight on the pavement before being buried in the crypt. Thomas was immediately revered as a martyr, and in 1173 was canonized by the pope; a simple shrine was erected over his tomb. In the following year, a fire (arson) destroyed the eastern arm of the cathedral, precipitating the construction of the present Trinity and Corona chapels, wherein St Thomas's remains were enshrined. After decades of delay and political strife, the enshrinement took place in 1220, in the presence of Henry III. The shrine comprised a great marble table, supported on six clusters of columns. On top of the table was a marble sarcophagus containing the saint's body in an iron-bound timber coffin, over which stood the sumptuous feretory, a gabled timber [roof], plated with sheets of gold and adorned with jewels. East of the shrine lies the small Corona chapel in which a fragment of Becket's skull was separately encased in a [head-shrine], and to the west a large area was paved with forty-eight figurative stone roundels, created by French artisans. All around, stained-glass windows display the early miracles of Becket. The layout of the Trinity chapel underwent transmutations, first around 1230, when the mosaic pavement was taken up from the old presbytery, reduced in size and relaid in front of Becket's shrine, where is it today. Second, the chapel was reordered in c. 1290, when the podium carrying the shrine was enlarged and the paving around it reconfigured. Medieval tombs were now being installed in the chapels, including those of the Black Prince and Henry IV. The end came in 1538, when Henry VIII ordered the thorough destruction of Becket's shrines, but a great deal of archaeological evidence remained in the floors, walls and a few surviving fragments of the shrines, all now recorded and discussed in this volume for the first time.

Escher, Jinny Beyer introduces quilters to the fascinating world of symmetry and then clearly shows how to experiment with shapes and images to create sensational, tessellating designs. Quilters will not only learn how to produce interlocking geometric patterns, but also will learn how easy it is to create true-to-life images of birds, fish, butterflies, and more in the style of Escher. **Mosaics in the Medieval World** Liz James 2017-10-05 In this book, Liz James offers a comprehensive history of wall mosaics produced in the European and Islamic middle ages. Taking into account a wide range of issues, including style and iconography, technique and material, and function and patronage, she examines mosaics within their historical context. She asks why the mosaic was such a popular medium and considers how mosaics work as historical 'documents' that tell us about attitudes and beliefs in the medieval world. The book is divided into two part. Part I explores the technical aspects of mosaics, including glass production, labour and materials, and costs. In Part II, James provides a chronological history of mosaics, charting the low and high points of mosaic art up until its abrupt end in the late middle ages. Written in a clear and engaging style, her book will serve as an essential resource for scholars and students of medieval mosaics.
