The Siblys of London Susan Sommers 2018-04-25 Ebenezer Sibly was a quack doctor, plagiarist, and masonic ritualist in late eighteenth-century London; his brother Manoah was a respectable accountant and a pastor who ministered to his congregation without pay for fifty years. The inventor of Dr. Sibly's Reanimating Solar Tincture, which claimed to restore the newly dead to life, Ebenezer himself died before he turned fifty and stayed that way despite being surrounded by bottles of the stuff. Asked to execute his will, which urged the continued manufacture of Solar Tincture, and left legacies for multiple and concurrent wives as well as an illegitimate son whose name the deceased could not recall, Manoah found his brother's record of financial and moral indiscretions so upsetting that he immediately resigned his executorship. Ebenezer's death brought a premature conclusion to a colorfully chaotic life, lived on the fringes of various interwoven esoteric subcultures. Drawing on such sources as ratebooks and pollbooks, personal letters and published sermons, burial registers and horoscopes, Susan Mitchell Sommers has woven together an engaging microhistory that offers useful revisions to scholarly accounts of Ebenezer and Manoah, while placing the entire Sibly family firmly in the esoteric byways of the eighteenth and early nineteenth centuries. The Siblys of London provides fascinating insight into the lives of a family who lived just outside our usual historical range of vision.

Church Life Michael Davies 2019-05-16 Church Life: Pastors, Congregations, and the Experience of Dissent in Seventeenth-Century England addresses the rich, complex, and varied nature of 'church life' experienced by England's Baptists, Congregationalists, and Presbyterians during the seventeenth century. Spanning the period from the English Revolution to the Glorious Revolution, and beyond, the contributors examine the social, political, and religious character of England's 'gathered' churches and reformed parishes: how pastors and their congregations interacted; how Dissenters related to their meetings as religious communities; and what the experience of church life was like for ordinary members as well as their ministers, including notably John Owen and Richard Baxter alongside less well-known figures, such as Ebenezer Chandler. Moving beyond the religious experience of the solitary individual, often exemplified by conversion, Church Life redefines the experience of Dissent, concentrating instead on the collective concerns of a communally-centred church life through a wide spectrum of issues: from questions of liberty and pastoral reform to matters of church discipline and respectability. With a substantial introduction that puts into context the key concepts of 'church life' and the 'Dissenting experience', the contributors offer fresh ways of understanding Protestant Dissent in seventeenth-century England: through differences in ecclesiology and pastoral theory, and via the buildings in which Dissent was nurtured to the building-up of Dissent during periods of civil war, persecution, and revolution. They draw on a broad range of printed and archival materials: from the minutes of the Westminster Assembly to the manuscript church books of early Dissenting congregations.

The book is very "student friendly" with numerous excellent pedagogical features - diagrams, end of chapter summaries, flow charts, mnemonics, differential shading of tables and columns, anecdotes, jokes, and historical references.
