[Demonic Possession and Exorcism](#) Sarah Ferber 2013-01-11 This is a highly original study of demon possession and the ritual of exorcism, both of which were rife in early modern times, and which reached epidemic proportions in France. Catholics at the time believed that the Devil was everywhere present, in the rise of the heretics, in the activities of witches, and even in the bodies of pious young women. The rite of exorcism was intended to heal the possessed and show the power of the Church - but it generated as many problems as it resolved. Possessed nuns endured frequently violent exorcisms, exorcists were suspected of conjuring devils, and possession itself came to be seen as a form of holiness, elevating several women to the status of living saints. Sarah Ferber offers a challenging study of one of the most intriguing phenomena of early modern Europe. Looking towards the present day, the book also argues that early modern conflicts over the Devil still carry an unexpected force and significance for Western Christianity.

How about Demons? Felicitas D. Goodman 1988-05-22 "Quite an interesting book... " Religious Studies Review" It is by far superior to anything else on demons we have seen in the past few years." The American Rationalist"...

Goodman is to be commended for a stimulating and wide-reaching treatment of a compelling and much-debated subject." Journal of Folklore Research Rich in detail derived from the author's fieldwork and the anthropological literature, this work paints a picture of possession as one of the usually positive and most widespread of human religious experiences. It also details the ritual of exorcism, which is applied when things go wrong.

Owning the World of Ideas Matthew David 2015-08-17 Formally, ownership of ideas is legally impossible, and can never be globally secured. Yet, in very real and significant ways these limits have been undone. In principle, ideas cannot be owned, yet, undoing the distinction between ideas and tangible manifestations, the distinction which underpins the principle, allows the principle to hold even whilst its meaning is hollowed out. Post-Cold War global network capitalism is premised upon regulatory structures designed to enforce deregulation in global markets and production, but at the same time to enforce global regulation of property and intellectual property in particular. However, this roll-out has not been without resistance and limitations. Globalization, the affordances of digital networks, and contradiction within capitalism itself - between private property and free markets - promote and undo global IP expansion. In this book David and Halbert map the rise of global IP protectionism, debunk the key justifications given for IPRs, dismiss the arguments put forward for global extension and harmonization; and suggest that roll-back,

suspension, and even simply the bi-passing of IP in practice offer better solutions for promoting innovation and meeting human needs.

Phenomenology and Aesthetics M. Kronegger 2012-12-06 and the one in the middle which judges as he enjoys and enjoys as he judges. This latter kind really reproduces the work of art anew. The division of our Symposium into three sections is justified by the fact that phenomenology, from Husserl, Heidegger, Moritz Geiger, Ingarden, in Germany and Poland, Merleau-Ponty, Paul Ricoeur, E. Levinas in France, Unamuno in Spain, and Tymieniecka, in the United States, have revealed striking coincidences in trying to answer the following questions: What is the philosophical vocation of literature? Does literature have any significance for our lives? Why does the lyric moment, present in all creative endeavors, in myth, dance, plastic art, ritual, poetry, lift the human life to a higher and authentically human level of the existential experience of man? Our investigations answer our fundamental inquiry: What makes a literary work a work of art? What makes a literary work a literary work, if not aesthetic enjoyment? As much as the formation of an aesthetic language culminates in artistic creation, the formation of a philosophical language lives within the orbit of creative imagination.

Possessing Nature Paula Findlen 1994-09-16 In 1500 few Europeans regarded nature as a subject worthy of inquiry. Yet fifty years later the first museums of natural history had appeared in Italy, dedicated to the marvels of nature. Italian patricians, their curiosity fueled by new voyages of exploration and the humanist rediscovery of nature, created vast collections as a means of knowing the world and used this knowledge to their greater glory. Drawing on extensive archives of visitors' books, letters, travel journals, memoirs, and pleas for patronage, Paula Findlen reconstructs the lost social world of Renaissance and Baroque museums. She follows the new study of natural history as it moved out of the universities and into sixteenth- and seventeenth-century scientific societies, religious orders, and princely courts. Findlen argues convincingly that natural history as a discipline blurred the border between the ancients and the moderns, between collecting in order to recover ancient wisdom and the development of new textual and experimental scholarship. Her vivid account reveals how the scientific revolution grew from the constant mediation between the old forms of knowledge and the new.

Having the World in View John McDowell 2009 A crucial moment came in the developing split between Anglo-American and continental European philosophers when G. E. Moore and Bertrand Russell rebelled against the "Hegelianism" of their teachers and inaugurated the tradition of "analytic" philosophy. In this new book, John McDowell builds on his much discussed *Mind and World*—one of the most highly regarded books in contemporary philosophy. McDowell, who has long commanded attention for his fresh approach to issues in contemporary epistemology, philosophy of language, and philosophy of mind, shocked some mainstream analytic philosophers in *Mind and World* by drawing inspiration not only from analytic philosophers but also from continental philosophers, most notably Hegel. McDowell argues that the roots of some problems plaguing contemporary philosophy can be found in issues that were first discerned by Kant, and that the best way to get a handle on them is to follow those issues as they are reshaped in the writings of Hegel and Sellars. *Having the World in View* will be a decisive further step toward healing the divisions in contemporary philosophy, by showing how central methods of the two traditions remain deeply entangled and by revealing how philosophers in both camps might still learn from each other.

Based on an impressive body of information and data, this volume recounts the history of five continents over a long stretch of time and in a comparative approach. From the beginning of European expansion the question was posed: what were the "empire tools" that gave Europe its military superiority, even before the industrial revolution? What was it that enabled Europeans

to withstand life-threatening tropical diseases and to control indigenous populations? This book gives a fresh and wide-ranging view of the construction and collapse of the modern colonial empires of Europe, the United States of America and Japan.

Emmanuel Levinas Abi Doukhan 2012-08-23

Our era is profoundly marked by the phenomenon of exile and it has become increasingly urgent to rethink the concept of exile and our stance towards it. This renewed reflection on the problem of exile brings to the fore a number of questions regarding the traditionally negative connotation of exile. Is there not another way to understand the condition of exile? Permeated with references to the 'stranger', the 'other' and 'exteriority', the philosophy of Emmanuel Levinas signifies a positive understanding of exile. This original and compelling book distills from Levinas's philosophy a wisdom of exile, for the first time shedding a positive light on the condition of exile itself. Abi Doukhan argues that Levinas's philosophy can be understood as a comprehensive philosophy of exile, from his ethics to his thoughts on society, love, knowledge, spirituality and art, thereby presenting a comprehensive view of the philosophy of Levinas himself as well as a renewed understanding of the wealth and

contribution of exile to a given society.

Spirit Possession in Buddhist Southeast Asia Bénédicte Brac de la Perrière 2022 In dramatic contrast to the reported growing influence of doctrinal and fundamentalist forms of religion in some parts of Southeast Asia, the predominantly Buddhist societies of the region are witnessing an upsurge of spirit possession cults and diverse forms of magical ritual. This is found in many social strata, including the urban poor, rising middle classes and elite groups, and across the different political systems of Myanmar, Thailand, Cambodia and Vietnam. This volume reveals both the central historical place of spirit possession rituals in the Buddhist cultures of mainland Southeast Asia and their important contemporary roles to enhance prosperity and protection. This book examines the increasing prominence of spirit mediumship and divination across the region by exploring the interplay of neoliberal capitalism, visual media, the network cultures of the Internet, and the politics of cultural heritage and identity. It advances beyond critiques of the "secularization" and "disenchantment" theses to explore the processes of modernity that are actively producing magical worldviews and stimulating the rise of spirit cults. As such, it not only challenges the assumptions of modernization theory but demonstrates that the cults in question are novel ritual forms that emerge out of inherently modern conditions.
