Childhood and Human Nature Sula Wolff 2017-12-06 How do we make sense of people? Human behaviour is complex, so that understanding ourselves and others calls for both objective and subjective viewpoints, as well as a flexible appreciation of human development over time. Dr Sula Wolff believes that knowledge about personality development is essential in three important domains: in the appraisal of deviant behaviour at all ages; in the development of social policy for children; and in therapeutic interventions for children and their families. In this book, originally published in 1989, Dr Wolff gives a comprehensive account of the major aspects of personality development in childhood. She reports research findings and presents developmental theories in their historical context, stressing the interplay between biological and cultural influences on development. Her account includes a wealth of illustrative case histories, with children and parents speaking for themselves; these provide fascinating reading and give substance to statistical results and theoretical propositions. Clearly and simply written, the book will be of interest to many people, and will still be of value to medical students, psychiatrists in training, students in social work and psychology, and teachers in special education.

Personality Theories Workbook Donna Musialowski Ashcraft 2002-06 This unique workbook was written for the undergraduate Personality course where professors are looking for activities to help students learn and apply personality theories to real-life examples. The workbook is geared toward personality courses that are theories-based, as opposed to research-based. Because the cases explored are those based on normal behavior (as opposed to abnormal behavior), this workbook is especially useful. While most personality texts present the major concepts of personality theories, they don't help students apply the theories they have learned or to use the theories to understand other examples on their own. This workbook will help students do just that and is the perfect complement to any Personality text.
