**Accounting for the Public Interest** Steven Mintz 2013-10-04 This volume explores the opportunities and challenges facing the accounting profession in an increasingly globalized business and financial reporting environment. It looks back at past experiences of the profession in attempting to meet its public interest obligation. It examines the role and responsibilities of accounting to society including regulatory requirements, increased emphasis on corporate social responsibility, accounting fraud and whistleblowing implications, internationalization of public interest obligations, and providing the education needed to be successful. The book incorporates an ethical dimension in making these assessments. Its focus is a conceptual, theoretical one drawing on classical philosophy, the sociology of professions, economic theory, and the public interest dimension of accountants as professionals. The authors of papers are long-time contributors to the annual symposium on Research in Accounting Ethics sponsored by the Public Interest Section of the AAA.

**The Rise of China and India in Africa** Fantu Cheru 2010-03-11 In recent years, China and India have become the most important economic partners of Africa and their footprints are growing by leaps and bounds, transforming Africa's international relations in a dramatic way. Although the overall impact of China and India's engagement in Africa has been positive in the short-term, partly as a result of higher returns from commodity exports fuelled by excessive demands from both countries, little research exists on the actual impact of China and India's growing involvement on Africa's economic transformation. This book examines in detail the opportunities and challenges posed by the increasing presence of China

and India in Africa, and proposes critical interventions that African governments must undertake in order to negotiate with China and India from a stronger and more informed platform.

**Handbook of Mould, Tool and Die Repair Welding** S Thompson 1999-10-15

This book covers an important and frequently overlooked area of welding - the repair of moulds, tools and dies. Because two rather different trades overlap in this process - welding and toolmaking, the materials and techniques involved have tended to be obscured. For many years, toolmakers and tool users have had to rely on the small number of specialist welders who do understand exactly what welding repair involves and have the skills to carry it out. Understanding the technical side of tool steels is frequently a problem for welders and understanding the practical side of welding can be a problem for machinists. This book has been

written so that specialists from both sides can get to grips with the techniques and procedures involved. The Handbook of mould, tool and die repair welding is designed to save companies time and money by: Acting as a training aid so that repairs can be carried out in-house Reducing the need to send work out and the costs involved Reducing the production time lost when repairs are required Providing clear diagrams and a user-friendly style to make the techniques easily understood It is an essential resource for Tool Room Managers and Foremen as well as maintenance and repair welding specialists. Comprehensive tool metal welder's reference work Written for the shop floor, by the shop floor Practical, easy to understand techniques designed to save time and money

WALNECK'S CLASSIC CYCLE TRADER, JULY 2005 Causey Enterprises, LLC

*Change and Resilience* Miguel Ángel Cau Ontiveros 2019-06-30 Change and Resilience offers a view of the main Mediterranean islands from West to East in Late Antiquity because Mediterranean islands can contribute in fundamental ways to our understanding not only of earlier colonizations but also later periods. The volume explores specifically the time frame from the fall of the Roman empire to the Medieval period. A first group of papers covers islands and island groups in the Central and Western

Mediterranean, including the Balearic Islands, Corsica, Sardinia, Sicily, and the Adriatic islands. Together, these five papers highlight several common themes across the region: local or indigenous sites were often reoccupied in Late Antiquity, the rural countryside typically played a significant role in the contributions of islands to wider Mediterranean economic networks, and islands — big and small — often played significant roles in shifting political and religious power. The second group focuses on the Eastern Mediterranean. Three papers cover a range of islands, including Crete, the Cyclades, and Cyprus. Together they emphasize the impacts external shifts in political power and economic ties in the Eastern Mediterranean had on island landscapes, as well as the connected relationship between sacred space and territorial occupation across many of these islands. The final group of papers pivots on changing perceptions of island landscapes in Late Antiquity — or — island mindscapes. — Three papers focus on how communities adapted as they underwent Christianization in island contexts, emphasizing the diverse and varied ways that island landscapes became — Christianized, — as well as how other political and economic factors shaped the dynamics of change.

**Rhythms of the Brain** Gyorgy Buzsaki 2006-08-03 This book provides eloquent support for the idea that spontaneous neuron activity, far from being mere noise, is actually the source of our cognitive abilities. In a

sequence of "cycles," György Buzsáki guides the reader from the physics of oscillations through neuronal assembly organization to complex cognitive processing and memory storage. His clear, fluid writing—accessible to any reader with some scientific knowledge—is supplemented by extensive footnotes and references that make it just as gratifying and instructive a read for the specialist. The coherent view of a single author who has been at the forefront of research in this exciting field, this volume is essential reading for anyone interested in our rapidly evolving understanding of the brain.

*Global Latinas* Lourdes Casanova 2009-02-27 "Most of the research on multinationals has focused on companies from developed markets. Research on multinationals from emerging economies is relatively new and most of the attention has been focused on multinationals from Asia. Little research has been done on the internationalization strategies and challenges of Latin American multinationals. This book aims to fill this void. Studying Latin American multinationals will not only provide insights into specific strategies deployed by successful firms but will also identify best practices that can be employed by the next generation multinationals from emerging markets." --Book Jacket.

**Universal Service** Milton Mueller 1997 Universal service is a focal point of telecommunications policy in the 1990s, not only in the United States, but in every other country that has begun to liberalize or deregulate its telecommunications industry. The new policy dialogue revolves around four questions. First, how much do the universal service obligations of incumbent telephone companies cost? Second, how can those costs be financed in a competitive environment? Third, what kind of technical and pricing arrangements should be made to interconnect incumbent telephone companies with the new, competing networks? Finally, should the service bundle designated as "universal service" be redefined to take into account new technologies, and if so, how? In the United States, debate over those issues reached a milestone when the U.S. Congress passed the Telecommunications Act of 1996. The new law is the first comprehensive revision of the Communications Act of 1934 and culminates twenty years of legislative struggle over how to adapt federal law to the new realities of telecommunications. In effect, the new law codifies the perceived wisdom about interconnection, competition, and universal service in telecommunications. Because one of the chief purposes of Milton Mueller's analysis is to mount a historically grounded challenge to that orthodoxy, the new law provides the perfect foil for a critique that links the historical

and contemporary policy debates over universal service.

*Weapons of Math Destruction* Cathy O'Neil 2016-09-06 NEW YORK TIMES BESTSELLER • A former Wall Street quant sounds the alarm on Big Data and the mathematical models that threaten to rip apart our social fabric—with a new afterword “A manual for the twenty-first-century citizen . . . relevant and urgent.”—Financial Times NATIONAL BOOK AWARD LONGLIST • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • The Boston Globe • Wired • Fortune • Kirkus Reviews • The Guardian • Nature • On Point We live in the age of the algorithm. Increasingly, the decisions that affect our lives—where we go to school, whether we can get a job or a loan, how much we pay for health insurance—are being made not by humans, but by machines. In theory, this should lead to greater fairness: Everyone is judged according to the same rules. But as mathematician and data scientist Cathy O'Neil reveals, the mathematical models being used today are unregulated and uncontested, even when they're wrong. Most troubling, they reinforce discrimination—propping up the lucky, punishing the downtrodden, and undermining our democracy in the process. Welcome to the dark side of

Big Data.

*The Great Divergence* Kenneth Pomeranz 2021-04-13 A landmark comparative history of Europe and China that examines why the Industrial Revolution emerged in the West The Great Divergence sheds light on one of the great questions of history: Why did sustained industrial growth begin in Northwest Europe? Historian Kenneth Pomeranz shows that as recently as 1750, life expectancy, consumption, and product and factor markets

were comparable in Europe and East Asia. Moreover, key regions in China and Japan were no worse off ecologically than those in Western Europe, with each region facing corresponding shortages of land-intensive products. Pomeranz's comparative lens reveals the two critical factors resulting in Europe's nineteenth-century divergence—the fortunate location of coal and access to trade with the New World. As East Asia's economy stagnated, Europe narrowly escaped the same fate largely due to favorable resource stocks from underground and overseas. This Princeton Classics edition includes a preface from the author and makes a powerful historical work available to new readers.

**Regulating Aged Care** John Braithwaite 2007-01-01 'Regulating Aged Care is a significant achievement and addresses areas of personal caring which do not usually receive attention. [It] is an important book which draws attention to the central problems of providing care for large numbers of vulnerable people. . . [it] should be required reading on undergraduate and postgraduate courses relating to applied social science, health and medical sociology.' Alison M. Ball, *Sociology* 'This book provides an impressive evidence base for both theory development and reassessment of policy and practitioner responses in the field.' *International Social*

*Security Review* 'They have given us a fascinating case study here, rich in detail, and masterfully interpreted against the backdrop of evolving regulatory strategy. It is rare indeed to find this depth of analysis made accessible, laced throughout with humanity, compassion, and humor.'

Malcolm Sparrow, Harvard University, US 'This book offers an intelligent and insightful account of the development of nursing home regulation in three countries England, the USA and Australia. But, more than that, it intertwines theory and more than a decade of empirical work to provide a telling and sophisticated explanation of why and how good regulatory intentions often go awry, and what can be done to create systems of regulation which really work to produce improvement.' Kieran Walshe, University of Manchester, UK This book is a major contribution to regulatory theory from three members of the world-class regulatory research group based in Australia. It marks a new development in responsive regulatory theory in which a strengths-based pyramid complements the regulatory pyramid. The authors compare the accomplishments of nursing home regulation in the US, the UK and Australia during the last 20 years and in a longer historical perspective. They find that gaming and ritualism, rather than defiance of regulators, are the greatest challenges for improving safety and quality of life for the elderly in care homes. *Regulating Aged Care* shows how good regulation

and caring professionalism can transcend ritualism. Better regulation is found to be as much about encouragement to expand strengths as incentives to fix problems. The book is underpinned by one of the most ambitious, sustained qualitative and quantitative data collections in both the regulatory literature and the aged care literature. This study provides an impressive evidence base for both theory development and reassessment of policy and practitioner responses in the field. The book will find its readership amongst regulatory scholars in political science, law, socio-legal studies, sociology, economics and public policy. Gerontology and health care scholars and professionals will also find much to reflect upon in the book.

**Man-made Catastrophes and Risk Information Concealment** Dmitry

Chernov 2015-10-27 This book discusses the risks of information concealment in the context of major natural or industrial disasters – offering detailed descriptions and analyses of some 25 historical cases (Three Mile Island nuclear accident, Bhopal disaster, Challenger Space Shuttle explosion, Chernobyl nuclear disaster, Deepwater Horizon oil spill, Fukushima-Daiichi nuclear disaster, Enron’s bankruptcy, Subprime mortgage crisis, Worldwide Spanish flu and SARS outbreaks, etc.) and applying these insights to selected on-going cases where such information

concealment is suspected. Some successful examples of preventive anti-concealment practice are also presented. In the book, the term ‘concealment’ is used to represent the two distinct behaviors uncovered in the investigations: (i) facts and information about an organization and its functioning being hidden from those that need them – here the concealment can be due to various factors, such as complexity and miscommunication, to name but two – and (ii) the conscious and deliberate action of keeping important information secret or misrepresenting it. This second meaning makes up a surprisingly important part of the evidence presented. Accordingly, emphasis has been put on this second aspect and the approach is more pragmatic than academic, remaining focused on evidence-based practical and useful factors. It raises awareness and provides valuable lessons for decision-makers, risk specialists and responsible citizens alike. This work is also intended as a fact-based reference work for future academic and scholarly investigations on the roots of the problem, in particular regarding any psychological or sociological modeling of human fallibility.

**Turning the Right Corner** Andreas Kopp 2013-06-27 Transport provides access to public services for the poor, opens up trade opportunities, and maximizes the benefits of urbanization: the mobility of people and goods

drives development. So how can we protect the role of transport in times of scarcer fuels, costly and harmful carbon emissions, and the rising threat of extreme weather events? This is the central question that this book seeks to answer. *Turning the Right Corner: Ensuring Development through a Low-Carbon Transport Sector* finds that adopting new vehicle technologies and alternative fuels will not be enough to curb greenhouse gas emissions from transport: new patterns of mobility will also be needed. In developing countries where past infrastructure investments have not yet locked in particular transport modes, there is an opportunity to contain emissions by harnessing low-emission modes of transport. The book argues that the transition to low-carbon mobility is not only urgently needed if economies are to avoid becoming locked into high-carbon growth, but is also affordable. It outlines how countries can combine policies to reduce greenhouse gas emissions with broader sector reforms that generate new

fiscal resources to finance the transition in addition to carbon financing and international assistance. *Turning the Right Corner: Ensuring Development through a Low-Carbon Transport Sector* will be of interest to policy makers, academics, and development practitioners with an interest in transport. It will help decisionmakers better understand how to contain the transport sector's contribution to climate change and protect transport infrastructure and services from severe weather events.
